## Counting

Haris is counting the number of things in his classroom.

Let's count with him.

## 1 <br> 2 <br> 3

|  | 1 | One |
| :---: | :---: | :---: |
| $\square \square \square$ | 2 | Two |
| - - | 3 | Three |
|  | 4 | Four |
|  | 5 | Five |
| (4) (4) | 6 | Six |
| , , , | 7 | Seven |
| $\Leftrightarrow \leqslant \leqslant \leqslant \leqslant \leqslant$ | 8 | Eight |
| $1>1 \times 1 \times 1 \times 1$ | 9 | Nine |

There is no tractor in the classroom. We can say there are 0 tractors.

Match the object with the correct number.

Count the objects and write the correct number.

5

## Place Value

Haris counted 9 pencils.
Sana found 1 more pencil.
How many pencils do they have now?

When we have $9+1$ objects, we group them together to form a bundle.

A single pencil represents a one.
A bundle of pencils represents a ten.

$$
=1 \text { one }
$$

$=1$ ten

We have 1 bundle and no other pencil. This means we have 1 tens and 0 ones.

|  | Tens | Ones |
| :---: | :---: | :---: |
|  | 1 | 0 |

Sana finds 1 more pencil. There is 1 bundle and 1 pencil now. This means there is 1 tens and 1 ones.

Count the number of bundles and pencils. Write tens and ones.

Haris has 10 blocks．
He combines these blocks to make a ten．

\section*{| $\square$ |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |}

We can use blocks to learn tens and ones．

| $\square$ | 1 block $=1$ one |
| :--- | :--- |
| 1 group $=1$ ten |  |
| of ten blocks |  |

Count the blocks．Write tens and ones．

|  |  | Tens | Ones |
| :---: | :---: | :---: | :---: |
| пाாா <br> ロாாाா | 品 | 2 | 3 |
|  |  |  |  |
|  |  |  |  |
|  | 吅 |  |  |

Haris and Sana have made groups of tens with their blocks．

Count the blocks and read the number．

|  | 10 | ten |
| :---: | :---: | :---: |
| 目目自 | 20 | twenty |
| 目目目慁 | 30 | thirty |
| 目目目慁目慁 | 40 | forty |
| 目目目目目慁目慁 | 50 | fifty |
| 目目目自目目目目目椬 | 60 | sixty |
| 目目目目目目目目目 | 70 | seventy |
| 目目目目目目目目目目目 | 80 | eighty |
|  | 90 | ninety |

Look at the number. Count tens and ones.

There are 5 tens. They represent 50 blocks. There are 9 ones. They represent 9 blocks.

$$
\begin{aligned}
& 59=5 \text { tens } 9 \text { ones } \\
& 59=50+9
\end{aligned}
$$

There are 3 tens. They represent 30 blocks.
There are 4 ones. They represent 4 blocks.

$$
\begin{aligned}
& 34=3 \text { tens } 4 \text { ones } \\
& 34=30+4
\end{aligned}
$$

Write the number of tens and ones.
$23=2$ tens 3 ones
$45=$ tens ___ ones
$62=$ tens ones
$87=\ldots$ tens ones
$43=$ tens ___ ones

Write tens and ones.
$56=50+6$

31
$=+$
$95=+$
$20=\ldots+$
$18=+$

## Numbers in words

Read numbers from 10 to 29.

| Family of $\mathbf{1 0}$ |  | Family of 20 |  |
| :--- | :---: | :--- | :--- |
| Ten | 10 | Twenty | 20 |
| Eleven | 11 | Twenty one | 21 |
| Twelve | 12 | Twenty two | 22 |
| Thirteen | 13 | Twenty three | 23 |
| Fourteen | 14 | Twenty four | 24 |
| Fifteen | 15 | Twenty five | 25 |
| Sixteen | 16 | Twenty six | 26 |
| Seventeen | 17 | Twenty seven | 27 |
| Eighteen | 18 | Twenty eight | 28 |
| Nineteen | 19 | Twenty nine | 29 |

Match the word with the correct number.

Fifteen

Read numbers from 30 to 49.

| Family of 30 | Family of 40 |  |  |
| :--- | :--- | :--- | :--- |
| Thirty | 30 | Forty | 40 |
| Thirty one | 31 | Forty one | 41 |
| Thirty two | 32 | Forty two | 42 |
| Thirty three | 33 | Forty three | 43 |
| Thirty four | 34 | Forty four | 44 |
| Thirty five | 35 | Forty five | 45 |
| Thirty six | 36 | Forty six | 46 |
| Thirty seven | 37 | Forty seven | 47 |
| Thirty eight | 38 | Forty eight | 48 |
| Thirty nine | 39 | Forty nine | 49 |

Match the word with the correct number.
$\begin{array}{ll}\text { Thirty nine............... } \\ & \\ \text { Thirty three }\end{array}$

Forty six 33

Forty nine 46

Read numbers from 50 to 69.

| Family of $\mathbf{5 0}$ |  | Family of $\mathbf{6 0}$ |  |
| :--- | :--- | :--- | :--- |
| Fifty | 50 | Sixty | 60 |
| Fifty one | 51 | Sixty one | 61 |
| Fifty two | 52 | Sixty two | 62 |
| Fifty three | 53 | Sixty three | 63 |
| Fifty four | 54 | Sixty four | 64 |
| Fifty five | 55 | Sixty five | 65 |
| Fifty six | 56 | Sixty six | 66 |
| Fifty seven | 57 | Sixty seven | 67 |
| Fifty eight | 58 | Sixty eight | 68 |
| Fifty nine | 59 | Sixty nine | 69 |

Match the word with the correct number.

Sixty five

Read numbers from 70 to 89.

Family of 70
Seventy 70
Seventy one 71
Seventy two 72
Seventy three 73
Seventy four 74
Seventy five 75
Seventy six 76
Seventy seven 77
Seventy eight 78
Seventy nine 79

Family of 80
Eighty 80
Eighty one 81
Eighty two 82
Eighty three 83
Eighty four 84
Eighty five 85
Eighty six 86
Eighty seven 87
Eighty eight 88
Eighty nine 89

Read the word and write the number.

Seventy two
72

Eighty four

Seventy six

Eighty

Read numbers from 90 to 99.

| Family of 90 |  |  |  |
| :--- | :--- | :--- | :--- |
| Ninety | 90 | Ninety five | 95 |
| Ninety one | 91 | Ninety six | 96 |
| Ninety two | 92 | Ninety seven | 97 |
| Ninety three | 93 | Ninety eight | 98 |
| Ninety four | 94 | Ninety nine | 99 |

Read the word and write the number.
93
Ninety three

97

## Hundred, Tens \& Ones

Hamza has 10 blocks of ten.
He joins them together.
10 blocks of ten joined together make a hundred.

10 blocks of ten $=1$ hundred

One block
$=1$ one
Set of 10 blocks = 1 ten

Set of 10 tens $=1$ hundred

Count and write hundreds, tens and ones.

Count and write hundreds，tens and ones．
英弗弗

Did you notice? There were 10 hundreds in the last row.

What happens when we have 10 hundreds?
We join them to form one big block.
This big block represents 1 thousand.

> 10 hundreds = 1 thousand 100 is the smallest 3-digit number 1000 is the smallest 4-digit number

Look at the given example.

$124=1$ hundred 2 tens 4 ones

Read the number. Write hundreds, tens and ones.
$354=3$ hundreds 5 tens 4 ones
$247=$ ___ hundreds ___ tens ___ ones

536 = ___ hundreds ___ tens ones
$260=$ hundreds ___ tens ___ ones
$680=$ hundreds ___ tens ones

473 = ___ hundreds ___ tens ones

Look at the given example.

1 hundred 3 tens 5 ones = 135

Read hundreds, tens and ones. Write the number.

8 hundreds 5 tens 3 ones $=\underline{853}$

7 hundreds 6 tens 1 one $=$

3 hundreds 1 tens 7 ones =

8 hundreds 4 tens 2 ones $=$

9 hundreds 2 tens 5 ones $=$

6 hundreds 2 tens 9 ones =

Look at the given number.

There is 1 hundred. It represents 100 blocks.
There are 6 tens. They represent 60 blocks.
There are 9 ones. They represent 9 blocks.

$$
169=100+60+9
$$

For the following numbers, write hundreds, tens and ones.

$$
\begin{aligned}
& 526=\underline{500}+\underline{20}+\square+\square \\
& 319=\square+\square \\
& 953=\square+\square \\
& 278=\square+\square \\
& 862=\square
\end{aligned}
$$

## Missing numbers

Read the number sequence from 100-199

| 100 | 110 | 120 | 130 | 140 | 150 | 160 | 170 | 180 | 190 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 101 | 111 | 121 | 131 | 141 | 151 | 161 | 171 | 181 | 191 |
| 102 | 112 | 122 | 132 | 142 | 152 | 162 | 172 | 182 | 192 |
| 103 | 113 | 123 | 133 | 143 | 153 | 163 | 173 | 183 | 193 |
| 104 | 114 | 124 | 134 | 144 | 154 | 164 | 174 | 184 | 194 |
| 105 | 115 | 125 | 135 | 145 | 155 | 165 | 175 | 185 | 195 |
| 106 | 116 | 126 | 136 | 146 | 156 | 166 | 176 | 186 | 196 |
| 107 | 117 | 127 | 137 | 147 | 157 | 167 | 177 | 187 | 197 |
| 108 | 118 | 128 | 138 | 148 | 158 | 168 | 178 | 188 | 198 |
| 109 | 119 | 129 | 139 | 149 | 159 | 169 | 179 | 189 | 199 |

Use the chart and circle the number that comes: just after 121 just before 180 at the end Complete the sequence.

141, 142, -143,

171,
____ ___ 174,

150, 151,
____, ____, 154,

192, 193, ___ _ _ 196,

Complete the number sequence from 200-299

| 200 | 210 | 220 | 230 | 240 | 250 | 260 | 270 | 280 | 290 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 201 | 211 |  |  |  |  |  |  |  |  |
| 202 |  |  |  |  | 252 |  |  |  |  |
| 203 |  |  |  |  |  |  |  |  |  |
| 204 |  |  |  |  |  |  |  |  |  |
| 205 |  |  |  |  |  |  |  |  |  |
| 206 |  |  | 236 |  |  |  |  |  |  |
| 207 |  |  |  |  |  |  | 277 |  |  |
| 208 |  |  |  |  |  |  |  |  |  |
| 209 |  |  |  |  |  |  |  |  | 299 |

The sequence of numbers after 100 remains the same. 999 is the greatest 3-digit number.

Complete the sequence.

| 450 to 479 |  |  |
| :--- | :--- | :--- |
| 450 | 460 | 470 |
|  |  |  |
|  |  |  |
| 453 |  |  |

Count backwards and complete the given sequences.

| 56 | 55 | 54 | - | 52 |
| :---: | :---: | :---: | :---: | :---: |
| 20 | 19 | - | - | 16 |
| 45 | - |  | 42 |  |
| 70 | - |  | 67 |  |
| 80 | - |  | 77 |  |
| 564 | 563 |  | - |  |
| 199 | 198 |  | - | 195 |
| 400 | - | 398 | - | 396 |
| 173 | 172 |  | - |  |
| 529 | - | - | - | 525 |
| 382 | 381 | - | 379 |  |

## Skip Counting by 10

Ali skips over 10 steps to go to 20, then another 10 steps to go to 30 .

This is called skip counting by 10 s.

We can count quickly by making sets of 10 .

There are 3 sets of ten. This means there are 30 stars.

There are 2 sets of ten. This means there are 20 sweets.

Count in 10s and write the number.

|  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

(oses)

|  |  |
| :---: | :---: |

## Skip Counting by 100

We can also count quickly by skipping in 100s.

| 10 | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 | 100 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 110 | 120 | 130 | 140 | 150 | 160 | 170 | 180 | 190 | 200 |
| 210 | 220 | 230 | 240 | 250 | 260 | 270 | 280 | 290 | 300 |
| 310 | 320 | 330 | 340 | 350 | 360 | 370 | 380 | 390 | 400 |
| 410 | 420 | 430 | 440 | 450 | 460 | 470 | 480 | 490 | 500 |
| 510 | 520 | 530 | 540 | 550 | 560 | 570 | 580 | 590 | 600 |
| 610 | 620 | 630 | 640 | 650 | 660 | 670 | 680 | 690 | 700 |
| 710 | 720 | 730 | 740 | 750 | 760 | 770 | 780 | 790 | 800 |
| 810 | 820 | 830 | 840 | 850 | 860 | 870 | 880 | 890 | 900 |
| 910 | 920 | 930 | 940 | 950 | 960 | 970 | 980 | 990 | 1000 |

There are 5 notes of Rs. 100.

Count in 100s. There are Rs. 500 in total.

Count in 100s and write the total number of blocks.

| $\square$ |  |  |  |  |  |  |  | - |  |  |  |  |  | $\square$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

|  |  |  |  |  |  | $\square$ |  |  |  |  |  |  |  | $\square$ |

Count in 100s and complete the sequence.
100, 200, 300 , $\qquad$

$\qquad$

## Comparing Numbers

Encircle the box with the greater number of objects.

Anum has 8 balls. Ali has 3 balls. Who has more balls?

8 is bigger than 3, so Anum has more balls.

Encircle the bigger number.

Ali has 5 sweets. Anum has 9 sweets. Who has less sweets?

5 is smaller than 9, so Ali has less sweets.

Encircle the smaller number.

Let's look at some other examples.

There are 3 children.
There are 3 balls.

There are 4 children.
There are 3 balls.
The number of children is more than the number of balls.

4 is 1 more than 3

7 is 1 more than 6

1 What is 1 more than 5 ?

. 6 is 1 more than 5.

2 What is 1 more than 4?

is 1 more than 4.

3 What is 1 more than 8 ?

is 1 more than 8 .

Look at this example.

5

5 is 1 less than 6

1 What is 1 less than 4 ?

3 is 1 less than 4.

2 What is 1 less than 5 ?

is 1 less than 5 .

3 What is 1 less than 7 ?

Which is the smaller number?

## $30 \quad 50$

| 1 | 2 |
| 1 | 5 |

2 ones are less than 8 ones and 5 ones.
12 is the smallest number.

Encircle the smallest number.

## Ascending and Descending Order

Arrange these numbers from the smallest to the biggest.

## $20 \quad 50 \quad 10$

(1) Encircle the smallest number.

$$
2050 \text { (10) }
$$

(2) Encircle the biggest number.

$$
20 \text { (5َ00) } 10
$$

Write the smallest number first and the bigges $\dagger$ number at the end.

$$
\underset{\text { smallest }}{10} \xrightarrow{20} \begin{gathered}
50 \\
\text { biggest }
\end{gathered}
$$

Arrange the given numbers from the smallest to the biggest.

538

$36 \quad 74 \quad 43$
$15 \quad 89 \quad 12$
$38 \quad 43 \quad 16$

Arrange these numbers from the biggest to the smallest.

$$
\begin{array}{lll}
47 & 53 & 18
\end{array}
$$

(1) Encircle the smallest number.

$$
4753 \text { (18) }
$$

(2) Encircle the biggest number.

$$
47 \text { (53 }
$$

(3) Write the biggest number first and the smallest number at the end.

Arrange the given numbers from the biggest to the smallest.

6
9
9 $\qquad$
$\qquad$
$43 \quad 55 \quad 82$
$61 \quad 78 \quad 97$
$\begin{array}{lll}56 & 85 & 26\end{array}$
$18 \quad 34 \quad 58$

Arrange these numbers from the smallest to the biggest.

## $241 \quad 160 \quad 396$

(1) Encircle the smallest number.

$$
241 \text { 160 } 396
$$

(20) Encircle the biggest number.

$$
241 \quad 160 \text { 396 }
$$

(3) Write the smallest number first and the bigges $\dagger$ number at the end.

$$
\underset{\text { smallest }}{160} \xrightarrow{241} \begin{gathered}
396 \\
\text { biggest }
\end{gathered}
$$

Arrange the numbers from the smallest to the biggest.
$115866 \quad 230 \quad 115 \quad 230 \quad \begin{gathered}866\end{gathered}$
$481 \quad 500360$
$\begin{array}{lll}790 & 860 & 120\end{array}$
$221 \quad 873 \quad 120$
$700 \quad 650 \quad 547$

Arrange these numbers from the biggest to the smallest.

## $472 \quad 800 \quad 915$

(i) Encircle the smallest number. (472), 800915
(2) Encircle the biggest number.

472800 '915;'
(3) Write the biggest number first and the smallest number at the end.

$$
\underset{\text { biggest }}{915} \xrightarrow{800} \begin{gathered}
472 \\
\text { smallest }
\end{gathered}
$$

Arrange the numbers from the biggest to the smallest.
$261 \quad 345 \quad 800 \quad 800 \quad 345 \quad 261$
$552128 \quad 470$
$389 \quad 965890$
$745 \quad 630 \quad 905$

208431580

## Ordinal Numbers

$1^{\text {st }} 2^{\text {nd }} 3^{\text {rd }}$ are called ordinal numbers.
Ordinal numbers tell us the position of the objects.
We can also write them as first, second, third.
Look at the things on the table.

Start from left.
$1^{\text {st }}$ Bag
$2^{\text {nd }}$ Football
$3^{\text {rd }}$ Pencil box

Class 2 students are standing in the assembly. Their names and positions are given.

What are the positions of these children?

Nazia

Anum

Ali

Bilal

Look at the positions and write the names of the children.
$2^{\text {nd }}$
$4^{\text {th }}$
$5^{\text {th }}$
$6^{\text {th }}$
$8^{\text {th }}$

## Ordinal Numbers

Start from left. Colour the 1st, 3rd, and 7th apple. E 5 E $\omega$ 5 © E $\square$ $\square$ sestass)

Start from left. Colour the 2nd, 4th, and 8th banana.

Start from left. Colour the 5th, 6th, and 9th pencil.
$\square$

$\square$

Start from left. Colour the 1st, 3rd, and 5th balloon.

Start from left. Write the ordinal position of blue triangles.

Start from left. Write the ordinal position of yellow bananas.

Look at the picture.

Start from left and fill in the blank.
$1^{\text {st }}$ $\qquad$ $2^{\text {nd }}$ $3^{\text {rd }}$

## Addition

Ahmed and Zara are playing with toys. They want to know the total number of toys.

Can you help to add the toys?

## Addition of tens and ones

Find the sum of 24 and 3.

| Tens | Ones |
| :---: | :---: |
| 2 | 4 |
| $+\quad 3$ |  |

Step 1: Tens Ones
Add ones.

Step 2:
Add tens.
Tens Ones

Find the sum of 27 and 12.
Tens Ones

| 1 |
| :---: |
| +39 |
| 3 |

Add the following numbers.

Tens Ones
Tens Ones

Tens Ones

Tens Ones

Tens Ones

Add the following numbers.

Tens Ones
Tens Ones

Tens Ones

Tens Ones

Tens Ones

Tens Ones

Tens Ones

Tens Ones

## Addition with carrying

Ahmed has 8 blocks. He finds 4 more under the table. How many blocks does he have now?

Step 1:

Add ones.
Tens Ones

8 ones +4 ones $=12$ ones
12 ones $=1$ ten 2 ones
Write 1 in the tens column
and 2 in the ones column.

Find the sum of 9 and 5 .
Step 1:
Add ones.

## Tens Ones

$$
\begin{aligned}
& 9 \text { ones }+5 \text { ones }=14 \text { ones } \\
& 14 \text { ones }=1 \text { ten } 4 \text { ones } \\
& \text { Write } 1 \text { in the tens column } \\
& \text { and } 4 \text { in the ones } \\
& \text { column. }
\end{aligned}
$$

Add the following numbers.

| Tens | Ones 7 | Tens | Ones 1 | Tens | Ones 9 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| + | 4 | + | 9 | + | 5 |
| Tens | Ones 6 | Tens | Ones 9 | Tens | Ones 9 |
| + | 7 | + | 3 | + | 2 |
| Tens | Ones 6 | Tens | Ones 6 | Tens | Ones 8 |
| + | 4 | + | 8 | + | 8 |

Tens Ones
Tens Ones
5
7

$$
\begin{array}{r}
5 \\
\hline
\end{array}
$$

Find the sum of 15 and 7.

Step 1:
Add ones.

5 ones +7 ones $=12$ ones
12 ones = 1 ten 2 ones We will write 2 in the ones column and carry 1 to the tens side.

Step 2:
Add tens.
Tens Ones

| Tens | Ones |
| :---: | :---: |
|  | ㅁ |

Add the following numbers.

Tens Ones

Tens Ones
5
9

Tens Ones
8

Tens Ones

Tens Ones
26

$\qquad$

Tens Ones

Tens Ones

Find the sum of 29 and 16.

Tens Ones

Step 1:
Add ones.

| Tens | Ones |
| :---: | :---: |
| $\square 111111$ $\square 1111111$ | ㅁㅁㅁㅁㅁㅁㅁㅁ |
| 吅吅 | $\square \square \square \square \square \square$ |

$$
\begin{gathered}
9 \text { ones }+6 \text { ones }=15 \text { ones } \\
15 \text { ones }=1 \text { ten } 5 \text { ones } \\
\text { We will write } 5 \text { in } \\
\text { the ones column } \\
\text { and carry } 1 \text { to the } \\
\text { tens side. }
\end{gathered}
$$

Step 2:
Add tens.

Add the following numbers.

Tens Ones

Tens Ones

Tens Ones

Tens Ones

Tens Ones

## Addition of hundreds, tens and units

Find the sum of 243 and 24.
Step 1:
Add ones.

Step 2:
Add tens.

Step 3:
Add hundreds

| Hundreds | Tens | Ones |
| :---: | :---: | :---: |
|  |  |  |

Add the following numbers. Remember that H stands for hundreds, T for tens and O for ones.

$\qquad$

7

5

Find the sum of 87 and 62.

Step 1：
Add ones．

Step 2：
Add tens．

| Hundreds | Tens | Ones |
| :---: | :---: | :---: |
|  |  | ロロロロロロロ |
|  |  | $\square \square$ |

8 tens +6 tens $=14$ tens
14 tens $=1$ hundred 4 tens
We will write 4 in
the tens column
and 1 in the hundreds
column

Add the following numbers. Remember that H stands for hundreds, T for tens and O for ones.

H TO
HT O
$7 \quad 2$
35

| 3 | 5 |
| :--- | :--- |
| 8 | 4 |

## Addition problems in daily life

There are 5 biscuits in the plate. Ali puts 2 more biscuits. How many total biscuits are there on the plate?

| There are 5 <br> biscuits in the plate. | 5 |  |
| :--- | :---: | :---: |
| Ali puts 2 more <br> biscuits. | 39 |  |
| Total biscuits | 2 |  |

Zara has 4 balloons. She buys 2 more. How many balloons does she have altogether?

| Zara has 4 <br> balloons. |  |
| :--- | :---: | :---: |
| She buys 2 more. | 4 |
| Total balloons | 2 |

Read the word problem. Complete the table and find the total number.

There were 7 balls in the box. Ahmed put 5 more balls. How many balls were in the box altogether?

| There were 7 <br> balls in the box. | 000. |  |
| :--- | :---: | :---: |
| Ahmed put 5 <br> more. | 000. |  |
| Total balls | 0000 <br> 000. |  |

Sana has 10 pencils. She buys 4 more pencils. How many pencils does she have in total?

| Sana has 10 <br> pencils. | $\\|\\|\\|\\|\\|$ |  |
| :--- | :--- | :--- |
| She buys 4 more <br> pencils. | $\\|\\|$ |  |
| Total pencils | $\\|\\|\\|\\|\\|\\|\\|\\|$ |  |

Read the following word problems and find the total number.

1 Haris has 20 sweets. His teacher gives him 5 more sweets. How many sweets does Haris have altogether?

2 Zara has 20 pencils. Sana has 15 pencils. How many pencils do they both have in total?

3 There are 129 pages in a book. There are 95 pages in another book. If Zara reads both books, how many pages will she read in total?

4 There are 154 boys and 126 girls in a school. How many students are there in the school altogether?

5 Imran has 43 apples and 27 oranges on his cart. What is the total number of fruits that he has on the cart?

## Finding the missing number

Find the missing number.

$$
2+\ldots=7
$$

(1) Look at the answer. Draw that many circles.

The answer is 7 so make
7 circles.
(2ii) Cut circles according to the number before the blank.

The number before the blank is 2 so we cut

2 circles
(3) Count the uncut circles. Fill in the missing number.

$$
2+\frac{5}{-7}
$$

The missing number is 5 .
5 circles are left uncut so we we write that in the blank

Find the missing number.

$$
\begin{aligned}
& 2+\ldots=5 \\
& 3+\square=7 \\
& 4+\square=8 \\
& 5+\square=3 \\
& 2+\square=8 \\
& 1+\square=9 \\
& 6+\square \\
& 3+\square \\
& 1+\square \\
& 2+\square \\
& 2+\square \\
& 3+\square
\end{aligned}
$$

## Subtraction

Ahmed and Zara are giving away some of their toys. They want to know the number of toys left.

Can you help them subtract?

5

$-2$
$-3$

## ——

7

$-5$
$-1$

$$
\begin{aligned}
& 9 \rho \theta \theta \phi \theta \theta \theta \theta \theta \\
& 4 \text { 룬 룽 } \\
& \text { - } 5 \\
& -2
\end{aligned}
$$

## Subtraction of tens and ones

Subtract 3 from 27.

$$
\begin{array}{cc}
\text { Tens } & \text { Ones } \\
2 & 7 \\
-\quad 3 \\
\hline
\end{array}
$$

Step 1:
Subtract ones.

Step 2:
Subtract tens.
Tens Ones

Find the difference between 24 and 13.
Tens Ones

| 2 |
| ---: |
| $-1 \quad 3$ |
| 11 |

Subtract the following numbers.

Tens Ones

Tens Ones

Tens Ones

Subtract the following numbers.

Tens Ones

Tens Ones

Tens Ones

8
$-24$

Tens Ones
8
2
$-1$
3

Tens Ones
$\begin{array}{r}56 \\ -13 \\ \hline\end{array}$

## Subtraction with borrowing

Subtract 7 from 31.

Step 1：

## Subtract ones．

We cannot subtract 7 ones from 1 one．
We will borrow 1 ten
from the tens side．
1 ten +1 one $=11$ ones
Step 2：
Subtract tens．

$$
11-7=4
$$

| Tens | Ones |
| :--- | :---: |
| 皿血血 | ㅁㅁ |

Subtract these numbers. Remember that T stands for tens and $O$ for ones.

## Remember:

(ii) Subtract ones. If you can not subtract ones, borrow 1 ten from the tens side. Then subtract ones. Subtract tens.

Subtract 18 from 42.

Step 1：
Subtract ones．

Step 2：
Subtract tens．

| Tens | Ones |
| :---: | :---: |
|  | － |
|  |  |
| Tens | Ones |
|  | ロロロロ |

Subtract the following numbers.

## Subtraction of hundreds, tens and ones

Subtract 143 from 267.
Step 1:
Subtract ones.

Step 2:
Subtract tens.

| Hundreds | Tens | Ones |
| :---: | :---: | :---: |
|  |  | - |
|  |  |  |

Step 3:
Subtract hundreds

Subtract the following numbers. Remember that H stands for hundreds, T for tens and O for ones.

H TO
$7 \quad 6 \quad 8$
H T O
489
5

H T O
4 $\begin{array}{ll}8 & 3 \\ 3 & 0\end{array}$

H
7

$\begin{array}{r}H 10 \\ 987 \\ -672 \\ \hline\end{array}$
H
7
9
0
8
$-365$
HT

53
6

- 423

Subtract 165 from 317.

Step 1：
Subtract ones．

Step 2：
Subtract tens．

Step 3：
Subtract hundreds

| Hundreds | Tens | Ones |
| :---: | :---: | :---: |
|  | － | －abinuan |
|  | \％ |  |
|  | \％m8n |  |
|  | 品如如 |  |
|  | $\square$ |  |
| － |  |  |
| \＃ | － |  |

| Hundreds | Tens | Ones |
| :---: | :---: | :---: |
|  |  |  |

| Hundreds | Tens | Ones |
| :---: | :---: | :---: |
|  | \％mism | －anamat |
|  |  |  |
| \＃ |  |  |
| － |  |  |
|  | 8ma |  |
| － | птит |  |

Let's look at another example.

Step 1:
Subtract ones.

We will borrow 1 ten from the tens side.
1 ten +4 ones $=14$ $14-7=7$

Step 2:
Subtract tens.

We are left with 1 ten so we will borrow 1 hundred from the hundreds side.

$$
11-5=6
$$

Step 3:
Subtract hundreds

We are left with
2 hundreds so we will subtract 1 from 2.

Subtract the following numbers.

429
$5 \quad 7$

| 42 |
| :--- |
| $-\quad 72$ |

Subtract the following numbers.

HT O
$\begin{array}{lll}9 & 3 & 6 \\ 7 & 1 & 8\end{array}$
$-7 \quad 18$
$\qquad$

H TO
$8 \quad 4 \quad 5$
$\begin{array}{r}-273 \\ \hline\end{array}$
$\begin{array}{r}657 \\ \hline\end{array}$
HT O

$\begin{array}{r}-1 \quad 9 \quad 4 \\ \hline\end{array}$
$\qquad$

## Subtraction problems in daily life

There are 5 apples on a tree. 2 apples fall off. How many are left on the tree?

| There are 5 apples <br> on a tree. |  |
| :--- | :--- | :--- |
| 2 apples fall off. | 5 |
| Apples left | 2 |

There are 4 bottles on a table. 1 bottle falls off. How many are left on the table?

| There are 4 <br> bottles. | 2 |  |
| :--- | :---: | :---: |
| bottle falls off. |  | 4 |
| Bottles left |  | 1 |

Read the word problem. Complete the table.

There are 6 oranges on a tree. 3 oranges fall off. How many are left on the tree?

| There are 6 |  |  |
| :--- | :--- | :--- |
| oranges on a tree. |  |  |
| 3 oranges fall off. |  |  |
| Oranges left on <br> the tree |  |  |

There are 7 biscuits in the plate. Ali eats 2 biscuits. How many are left on the plate?

| There are 7 |  |  |
| :--- | :--- | :--- |
| biscuits in the plate. | 5 |  |
| Ali eats 2 biscuits. |  |  |
| Biscuits left in the | 53 |  |
| plate |  |  |

Read the word problem and solve the question.

1) Adil has 16 carrots. His sister ate 3 carrots. How many carrots were left with Adil?

2 There are 39 students in Ahmed's class. 5 students were absent. How many students were present?

3 Sana has 549 beads. She loses 127 beads. How many beads are left?

4 Imran grew 81 plants. Thirteen plants died during the summer. How many plants were left?

5 Ahmed has 135 books. He gives away 18 books to his friends. How many books are left?

6 There were 81 pots in Imran's shop. He sold 27 pots. How many pots were left?

## Finding the missing number

Find the missing number.

$$
5-\ldots=2
$$

(1) Look at the answer. Draw that many circles.

The answer is
2 so we make 2 circles.
(2) Look at the number before the blank. Draw more circles till you reach that number.

The number before the blank is 5 so we make 3 more circles.
(3) Count the additional circles you made. Fill in the missing number.

$$
5-\frac{3}{5-2}
$$

The missing number is 3 .

We made 3 more circles so we write that in the blank.

Find the missing number.

$$
\begin{aligned}
& 5-\ldots=4 \\
& 7-\ldots=2 \\
& 4-\ldots=6 \\
& 9-\ldots=3 \\
& 3-\ldots=\ldots \\
& 8-\ldots
\end{aligned}
$$

$$
6-\ldots=4
$$

$$
7-\ldots=3
$$

$$
2-\ldots=1
$$

$$
9-\ldots=4
$$

## Repeated Addition \& Multiplication

How many apples are there altogether?

There are 3 groups.
Each group has 2 apples.
$2+2+2=6$

There are 6 apples altogether.

How many fish are there in total?

There are 5 bowls.
Each bowl has 2 fish.

$$
2+2+2+2+2=10
$$

There are 10 fish in total.

Count the number of groups. Count the objects in each group and write the total number.

There are groups.

Each group has sweets.

$$
4+4=
$$

There are groups.

Each group has $\qquad$

There are groups.

Each group has $\square$

## Multiplication

How many stars are there altogether?

There are 4 groups. Each group has 2 stars.

$$
\begin{aligned}
& 2+2+2+2=8 \\
& 4 \times 2=8
\end{aligned}
$$

We read it as four times two equals eight.

$$
x \text { is read as times. }
$$

It means to multiply or to put all the equal groups altogether.

How many mangoes are there in total?

There are 3 groups. Each group has 5 mangoes.
$5+5+5=15$
$3 \times 5=15$
We read it as three times five equals fifteen.

Look at the pictures and fill in the blanks.

There are ___ groups.
Each group has ___ oranges.
$3 x$

3 times $\qquad$ equals $\qquad$ .

There are __ oranges altogether.

There are ___ groups.
Each group has ___ butterflies.

- $\times 2=$
times 2 equals $\qquad$ .

There are __ butterflies altogether.

## Multiplication Table of 2

$10 \times 2=20$
10 times 2 equals 20

## Multiplication Table of 3

$1 \times 3=3$
1 times 3 equals 3
$2 \times 3=6$
2 times 3 equals 6
$3 \times 3=9$
3 times 3 equals 9
$4 \times 3=12$
4 times 3 equals 12
$5 \times 3=15$
5 times 3 equals 15
$6 \times 3=18$
6 times 3 equals 18
$7 \times 3=21$
7 times 3 equals 21
$8 \times 3=24$
8 times 3 equals 24
$9 \times 3=27$
9 times 3 equals 27
$10 \times 3=30$
10 times 3 equals 30

Read the table of 2 and write the answers.
$2 \times 2=$
$9 \times 2=$
$1 \times 2=$
$5 \times 2=$
$6 \times 2=$

Complete the table of 2 .

| $x$ | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| :---: | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 2 | 2 | 4 |  |  |  |  |  |  |  |  |

Look at the pictures and fill in the blanks.

$4 \times$
4 times $\qquad$ equals $\qquad$
There are ___ triangles altogether.

Complete the table of 3 .

| $x$ | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| :---: | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 3 | 3 | 6 |  |  |  |  |  |  |  |  |

## Multiplication Table of 4

$1 \times 4=4$
1 times 4 equals 4
$2 \times 4=8$
2 times 4 equals 8
$3 \times 4=12$
3 times 4 equals 12
$4 \times 4=16$
4 times 4 equals 16
$5 \times 4=20$
5 times 4 equals 20
$6 \times 4=24$
6 times 4 equals 24
$7 \times 4=28$
7 times 4 equals 28
$8 \times 4=32$
8 times 4 equals 32

$9 \times 4=36$
9 times 4 equals 36
號
102

$\because \stackrel{\rightharpoonup}{*}$
$10 \times 4=40$
10 times 4 equals 40

## Multiplication Table of 5

$10 \times 5=50$
10 times 5 equals 50

Read the table of 4 and write the answers.
$2 \times 4=$
$5 \times 4=$
$7 \times 4=$ $\qquad$
$8 \times 4=$
$3 \times 4=$
$6 \times 4=$ $\qquad$

Complete the table of 4 .

| $x$ | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| :---: | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 4 | 4 | 8 |  |  |  |  |  |  |  |  |

Look at the pictures and fill in the blanks.

2 times___ equals
There are ___ butterflies altogether.

Complete the table of 5 .

| $x$ | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 5 | 5 | 10 |  |  |  |  |  |  |  |  |

# Multiplication Table of 10 

| * |  |
| :---: | :---: |
|  | $\stackrel{ }{*}$ |
|  |  |
|  |  |

$8 \times 10=80$
8 times 10 equals 80
$7 \times 10=70$
7 times 10 equals 70

$9 \times 10=90$
9 times 10 equals 90

[

$10 \times 10=100$
10 times 10 equals 100

## More about Multiplication

How many keys are there in total?

$$
2+2+2
$$

There are 3 twos so:

$$
\begin{aligned}
& 2+2+2=3 \times 2 \\
& 3 \times 2=6
\end{aligned}
$$

There are 6 keys altogether.

How many erasers are there in total?

$$
\frac{\text { III III III III III }}{3+3+3+3+3}
$$

There are 5 threes so:

$$
\begin{aligned}
3+3+3+3+3 & =5 \times 3 \\
5 \times 3 & =15
\end{aligned}
$$

There are 15 erasers altogether.

Fill in the blanks.

$$
\begin{aligned}
4+\ldots+4 & =3 \times \ldots \times 5 \\
5+5 & =-4 \times 3 \\
+3+3+\ldots & =4 \times 6 \\
6+6+\ldots & =3 \times 2
\end{aligned}
$$

Multiply and write the answer.

$$
3 \times 2=
$$

$$
3 \times 5=
$$

$$
1 \times 3=
$$

$$
9 \times 4=
$$

$$
8 \times 3=
$$

## Repeated Subtraction \& Division

Hamza had 8 balloons.

Zubair took 2 balloons from him.

$$
8-2=6
$$

Hamza was left with 6 balloons.

Ali took 2 balloons.

$$
6-2=4
$$

Hamza was left with 4 balloons.

Ahmed took 2 balloons.

$$
4-2=2
$$

Hamza was left with 2 balloons.

Asif took 2 balloons.

$$
2-2=0
$$

Hamza was left with 0 balloon. 108

How many times did Hamza subtract 2?

$$
\begin{aligned}
& 8-2=6 \\
& 6-2=4 \\
& 4-2=2 \\
& 2-2=0
\end{aligned}
$$

Hamza subtracted 2 four times.

There are 10 stars. How many times can you subtract 2?

$$
* *
$$

$$
10-2=8
$$

$$
8-2=6
$$

$$
6-2=4
$$

$$
4-2=2
$$

$$
2-2=0
$$

We can subtract 2 five times.

Count the objects. Subtract 2 from them till you are left with 0 .
|||||||

$$
\begin{aligned}
& 8-2= \\
&-2= \\
&-2= \\
&-2= \\
&-
\end{aligned}
$$

$$
\begin{array}{r}
4-2= \\
-2=
\end{array}
$$

$$
\begin{aligned}
6-2 & = \\
-2 & = \\
-2 & =
\end{aligned}
$$

## Division

Ahmed has 6 apples.
He wants to put the 6 apples equally into 2 bags.

$$
6 \div 2=3
$$

6 divided by 2 is equal to 3 .
There are 3 apples in each bag.
$\div$ is read as divided by.
$\div$ stands for division

Now, Ahmed wants to put the 6 apples equally into 3 bags.

$$
6 \div 3=2
$$

There are 2 apples in each bag.

Anum has 12 sweets.
She shares the sweets equally among her 4 friends.

$$
12 \div 4=3
$$

Each friend gets 3 sweets.

Haris has 10 erasers.
He puts equal number of erasers in 2 boxes.

$$
10 \div 2=5
$$

There are 5 erasers in each box.

Anum has 9 rings.
She puts equal number of rings in 3 boxes.

$$
9 \div 3=3
$$

There are 3 rings in each box.

Sana has 18 biscuits.
She shares the biscuits equally among her 3 friends.

$$
18 \div 3=
$$

Each friend gets biscuits.

Ahmed has 12 marbles. He puts equal number of marbles in 2 boxes.

$12 \div 2=$ $\qquad$
There are __ marbles in each box.

Ali has 15 oranges.
He puts equal number of oranges in 5 boxes.

$15 \div 5=$
There are ___ oranges in each box.

1 Ali has 20 mangoes.
He puts equal number of mangoes in 4 boxes.

$$
20 \div 4=
$$

There are ___ mangoes in each box.

2 Zara has 10 pencils.
She puts equal number of pencils 5 boxes.

There are ___ pencils in each box.

3 Haris has 30 sweets.
He puts equal number of sweets in 3 boxes.

$$
30 \div 3=
$$

$\qquad$
There are $\qquad$ sweets in each box.

Hamza has 8 balloons.

He shares the balloons equally with his 4 friends.

How many balloons does each friend get?

$$
8 \div 4=?
$$

Recall the table of 4.

$$
\begin{aligned}
& 1 \times 4=4 \\
& 2 \times 4=8
\end{aligned}
$$

8 comes in the table of 4 after 2 times.

$$
8 \div 4=2
$$

Each friend gets 2 balloons.

Anum has 6 cups.

She puts equal number of cups in 3 boxes. How many cups are there in each box?

$$
6 \div 3=?
$$

Recall the table of 3 .

$$
\begin{aligned}
& 1 \times 3=3 \\
& 2 \times 3=6
\end{aligned}
$$

6 comes in the table of 3 in the second step.

$$
6 \div 3=2
$$

There are 2 cups in each box.

Divide these numbers.
$6 \div 2=3$

$$
\left.\begin{array}{ll}
2 \times 1=2 \\
2 \times 2=4 & 6 \text { comes } \\
\text { in the } \\
\text { table of } 2 \\
2 \times 3=6
\end{array}\right] \begin{aligned}
& \text { in the third step. }
\end{aligned}
$$

$12 \div 4=$
$6 \div 2=$
$25 \div 5=$

$$
40 \div 10=
$$

$$
24 \div 4=
$$

$\qquad$

## Shapes

We see shapes around us.

This is a triangle. A triangle has three sides.

This is a rectangle. A rectangle has two equal sides.

This is a circle. It has no sides.

This is a square. A square has four equal sides.

Colour the shape that is like the one in the first column.

Write 1 in all rectangles, 2 in all squares, 3 in all circles and 4 in all triangles.

We can make pictures using shapes.

The house is made of 1 triangle, 4 squares and 2 rectangles.

Now, try and make a different picture using these shapes in your notebooks.

## Vertex of a shape

The point where 2 sides join is called a vertex.

A triangle has 3 vertices.

A rectangle has 4 vertices.

A circle has
0 vertex.

A square has
4 vertices.

Complete the tables.

| Shape | Name | Sides | Vertices |
| :---: | :--- | :--- | :--- |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |

|  | Riddles |
| :--- | :--- |
| I have 3 sides. |  |
| I have 3 vertices. |  |
| Who am I? |  |
| I have 4 sides. |  |
| I have 4 vertices. |  |
| My sides are equal. |  |
| Who am I ? |  |
| I have no side. |  |
| I have no vertex. |  |
| Who am I? |  |

We use money every day in our lives. We buy things using coins and notes.

Here are some of the coins and notes we use.

Rs. 5

Rs. 2

Re. 1

Rs. 10

Rs. 20

Rs. 50

Rs. 100

Sana has a Rs. 10 note and a Rs. 5 coin. How much money does she have?

10

Sana has Rs. 15 in total.

Count the money in each box and write the total amount.

Rs. $\qquad$

Rs.

$\qquad$

Rs. $\qquad$

Rs. $\qquad$

Rs.
Rs. $\qquad$

Rs.

Ali and Zara are at a shop with their father.
They each buy some things. Here are the prices of the things they buy.

Rs. 50

Rs. 100

Rs. 30

Rs. 70

Can you help each of them calculate the total cost?

Zara buys a bag and a cap. What is her total cost?

Ali buys a football and cap. What is his total cost?

Their father buys a book and a bag. What is his total cost?

Ali and Zara stop to buy some apples.

The cost of the apples is Rs. 70.

Their father gives a Rs. 100 note to the fruit seller.

How much money does he get back?

Ali and Zara's father got Rs. 30 back.

When the money that we give is more than the cost of the object, we get back change.

We can say that Ali's father got back Rs. 30 change.

Eraser
Rs. 4

Ruler
Rs. 20
Notebook
Rs. 35

1 Ali buys a pencil. He gives the shopkeeper a Rs. 20 note. How much change does he get back?

2 Sana buys a ruler. She gives the shopkeeper a Rs. 50 note. How much change does she get back?

3 Zubair buys a notebook. He gives the shopkeeper a Rs. 100 note. How much change does he get back?

4 Zain buys a sharpener. He gives the shopkeeper a Rs. 20 note. How much change does he get back?

## Measuring Length

## Encircle the longer object.

We can use different things to measure the length of a blackboard.

We can use hand span.

We can use a book.

Measure with your hand span and write the length of these objects.

Desk $\qquad$

Bag $\qquad$ hand spans

Blackboard $\qquad$ hand spans

Chair $\square$ hand spans

## Length in centimetres

For a standard measurement, we use units.
Centimetre is a unit of measurement. We can also write it as cm .

We can use a ruler to measure the length of an object.

The length from the 0 mark to the 1 mark on the ruler below is 1 centimetre.

The eraser is 4 cm long.
The pencil is 10 cm long.
The scissor is 15 cm long.

Read the lengths of the objects below.

The length of the pencil is $\qquad$

The length of the nail is $\qquad$

The length of the comb is cm.

## Length in metres

Ali wants to know the length of the wall. He uses a metre ruler.

We can use metres to measure longer objects.

Metres is another unit of measurement. We can write it as m .

Tell whether we will use metres or centimetres to measure the given objects.

| Truck |  | cm | m |
| :--- | :--- | :--- | :--- |
| Pencil box |  | cm | m |
| Car | cm | m |  |

Look at the metre ruler. It is 1 metre long.

The chair is shorter than the metre ruler. It is less than 1 m tall.

Zara is about as tall as the metre ruler. She is about 1 m tall.

The teacher is taller than the metre ruler. She is more than 1 m tall.

Look at the metre ruler. It is 1 metre long.

Which object is greater than 1 m ?

Which object is less than 1 m ?

1 Ahmed bought 44 metres long pipe. His brother bought 9 metres long pipe. What is the total length of both pipes?

2 Seema has a 54 metre long wire. She gives away 20 metres to her brother. How many metres wire does Seema have now?

We can use a ruler to draw a line of certain length.
${ }_{1}{ }^{\text {sif }}$ Place the ruler straight on a flat surface.

${ }_{2}^{\text {Stip }}$ Draw a line from 0 to 5 cm .

Read the length. Use a ruler to draw a line of that length.

1. 6 cm

2 7 cm
3 3 cm
$4 \quad 4 \mathrm{~cm}$
$5 \quad 9 \mathrm{~cm}$

## Measuring Mass

Encircle the side that is heavier.

## Measuring Mass

We can use standard units of measurement to measure mass.

Gram is a standard unit of measurement. We can write it as $\mathbf{g}$.

Look at this: 9
This is equal to 1 gram.

There are 4 g
The mass of the pencil is 4 g .

Kilogram is another standard unit of measurement. We can write it as $\mathbf{k g}$. Look at this:kg

This is equal to 1 kilogram.

There is 1 kg
The mass of the
flour is 1 kg .

Look at the pictures. Write the mass of each object.

9
kg

kg
g

1) The mass of mangoes is 5 kg . The mass of apples is 2 kg . What is the total mass of apples and mangoes?
2. Ahmed bought 18 kg of ice. He used 3 kg of ice. How many kg of ice were left?

## Measuring Capacity

Look at the jug. How many glasses of water can it hold?

This jug can hold 3 glasses of water.

Encircle the object that will hold less water than the jug.

Encircle the object that will hold the most water.

Sana wants to know the exact amount of water that this pot can hold.

The pot can hold 2 jugs of water.

Each jug can hold 1 litre.
Litre is the standard unit of measurement used to measure capacity. We can write it as L .

The pot can hold 2 L of water.
Millilitres is also a standard unit of measurement used to measure capacity. We can write it as mL .

Look at this jug.
This has 200 mL of water.

Look at the measuring jug. Write the amount of water in the jug.

mL

mL

$\ldots \mathrm{mL}$

1 There are 400 litres of water in a tank. There are 80 litres of water in a pot. How many litres of water are there altogether?

2 There are 20 litres of water in a bottle. Hassan drinks 3 litres of water. How many litres of water are left in the bottle?

## Fractions

Look at the circle.
It is divided into 2 equal parts.
1 part out of 2 is coloured
$\frac{1}{2}$ of the circle is coloured.

The circle is divided into 4 equal parts. 1 part out of 4 is coloured.
$\frac{1}{4}$ of the circle is coloured.

The circle divided into 3 equal parts.
1 part out of 3 is coloured.
$\frac{1}{3}$ of the circle is coloured.

$\frac{1}{2}, \frac{1}{4}$ and $\frac{1}{3}$ are examples of fractions.
A fraction shows a part of a whole that is divided into equal parts.

The square is divided into 2 equal parts.
1 part out of 2 is coloured
$\frac{1}{2}$ of the square is coloured.

We say one half of the square is coloured.

The square is divided into 4 equal parts.
1 part out of 4 is coloured
$\frac{1}{4}$ of the square is coloured.

We say one quarter of the square is coloured.

The square is divided into 3 equal parts.
1 part out of 3 is coloured.
$\frac{1}{3}$ of the square is coloured.

We say one third of the square is coloured.

Look at the rectangle. What fraction of the rectangle is coloured?

(1) Count the number of parts. Write them under the line.

The rectangle has
3 parts so we will write 3 under the line.
(210) Count the number of coloured parts. Write them above the line.

> The rectangle has
> 1 coloured part so we will write 1 above the line.
$\frac{1}{3}$ of the rectangle is coloured.

In the following figures, look at the total number of parts. Then look at the coloured part. Write the fraction that is coloured.

Look at the circle.
Colour $\frac{1}{3}$ of the circle.

$$
\begin{gathered}
\frac{1}{3}=1 \text { out of } 3 \\
\text { equal parts }
\end{gathered}
$$

We will colour 1 out of 3 parts.

Look at the square.
Colour $\frac{1}{4}$ of the square.

$$
\frac{1}{4}=1 \text { out of } 4
$$

We will colour 1 out of 4 parts.

In the following table, look at the fraction and colour the figure.

| $\frac{1}{3}$ |  |
| :---: | :---: |
| $\frac{1}{2}$ |  |
| $\frac{1}{4}$ |  |
| $\frac{1}{2}$ |  |
| $\frac{1}{4}$ |  |
| $\frac{1}{3}$ |  |

## More about Fractions

Look at the circle. What fraction of the circle is coloured?

(1) Count the number of parts. Write them under the line.

The circle has
8 parts so we will write 8
under the line.
(2) Count the number of coloured parts. Write them above the line.

The circle has
1 coloured part so we will write 1 above the line.
$\frac{1}{8}$ of the circle is coloured.

## Look at the figure. Write the fraction that is coloured.

Read the fraction. Match it with the correct figure.

$\frac{1}{6}$

$\frac{1}{5}$

$\frac{1}{4}$

$\frac{1}{12}$

## Time

A clock tells us the time.
It has a minute hand and an hour hand.

The longer hand is the minute hand. It shows us the minutes.

The shorter hand is the hour hand.
It shows us the hours.
When the minute hand is pointing towards 12, we read the time as $0^{\prime}$ clock.

Match the clock with the correct time.

|  | $9 \mathrm{o}^{\prime}$ clock |
| :---: | :---: |
|  | $110^{\prime}$ clock |
|  | $5 \mathrm{o}^{\prime}$ clock |

Read the time. Make hands on the clock.

Look at this clock.

The minute hand is at 12 and the hour hand is at 3 .
The minute hand wants to move from 12 to 1 . It will count till 5 to reach number 1 .

It will again count till 5 to reach number 2 and so on.

The number of times the long hand is moving are called minutes.

How many minutes are there?
Let's count in 5.

It takes 60 minutes for the hour hand to move from 3 to 4.

Look at this clock.
The hour hand is at 3 .
The minute hand is at 1 .
This means it is 5 minutes after 3 o'clock.

Look at this clock.

The hour hand is at 3 . We write 3 on the left side.

$$
3 \text { : }
$$

The minute hand is at 2 . This means it is 10 minutes after 3 o'clock. We write 10 on the right hand side.

$$
3: 10
$$

We read this as three ten.

The time is $9: 30$. We read it as nine thirty.

Look at the clock. Write the time under each clock.

Ali wakes up at 8:15 in the morning.

Ali sleeps at 8:15 at night

When Ali wakes up, we say it is 8:15 am.
When Ali goes to sleep, we say it is 8:15 pm.

We use am to talk about time just after 12 at night to just before 12 in the morning.

We use pm to talk about time just after 12 in the noon to just before 12 at night.

Read the sentence and encircle the right option.

We go to school at 8 $\qquad$ .

Zara eats her breakfast at 9 $\qquad$ .

I go to sleep at 10 $\qquad$ .

| am | pm |
| :--- | :--- |
| am | pm |
| am | pm |

## Months of the year

Ali's birthday is in April. Zara's birthday is in July. April and July are names of the months.

There are 12 months in a year

## Have you seen a calendar?

It shows all the months and dates in a year.

| January |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| S | M | T | W | T | F | S |
