

"Education is a matter of life and death for Pakistan. The world is progressing so rapidly that without requisite advance in education, not only shall we be left behind others but may be wiped out altogether."

(September 26, 1947, Karachi)

Quaid-e-Azam Muhammad Ali Jinnah Founder of Pakistan

Developed and Sent by: Education Reforms and Textbook Development Wing of School Education Department, Govt. of the Punjab

Approved by:

Punjab Curriculum and Textbook Board, Lahore

All textbooks of the Punjab Curriculum and Textbook Board carry a rectangular shaped security sticker on the title page. The sticker exhibits a unique colour shift due to change of angle (orange to green) in the logo of Punjab Curriculum and Textbook Board, Lahore. Moreover, if you scratch protective coating on the white space below the monogram with a coin, it will reveal the registered trade name "PCTB". For further verification, send given code in the security label as an SMS (e.g. PCTB (Space) Code No.) on "8070" and participate in the prize scheme. If reply is according to given serial number then it is original. Look for the security sticker while purchasing the textbooks. If there is no sticker on the title page or it has been tampered with, do not buy such a book.

### Numbers to 100,000

How many tens and ones are in 53?

There are 5 tens. They represent 50 blocks.

There are 3 ones. They represent 3 blocks.

$$53 = 5 \text{ tens } 3 \text{ ones}$$

$$53 = 50 + 3$$

#### Count the blocks. Write tens and ones.

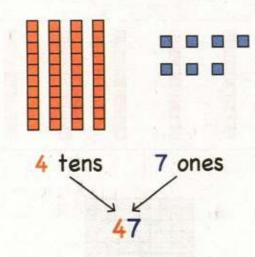

Tens	Ones
- 7-0,	- 10
1 1 1 2	
	20 83
	Tens

#### Write the number of tens and ones.

$$42 = 4$$
 tens 2 ones

#### Write tens and ones.

#### Look at this example.

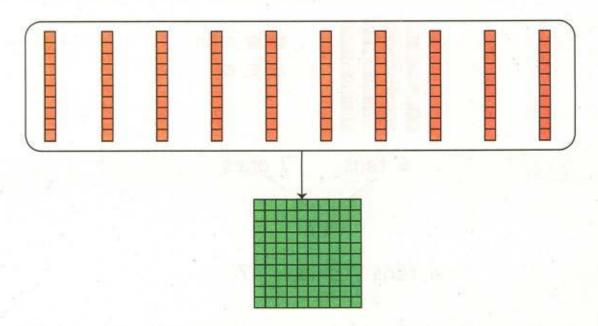

4 tens 7 ones = 47

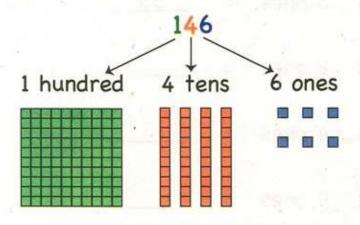

#### Read tens and ones. Write the number.

5 tens 3 ones = 
$$53$$

10 tens joined together make a hundred.

How many hundreds, tens and ones are in 146?

There is 1 hundred, 4 tens and 6 ones in 146.

146 = 1 hundred 4 tens and 6 ones

#### Write the number of hundreds, tens and ones.

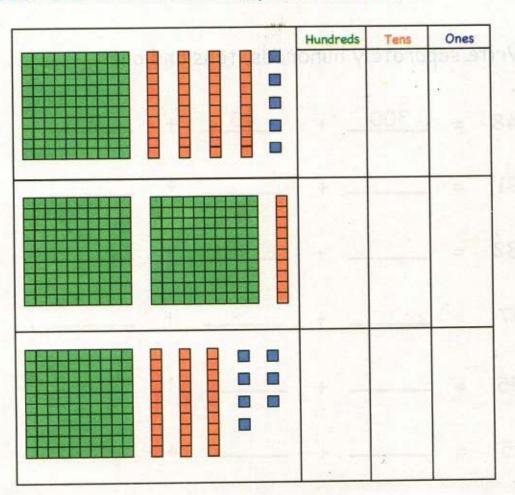

186 = 1 hundred 8 tens 6 ones

519 = \_\_\_ hundreds \_\_\_ tens \_\_\_ ones

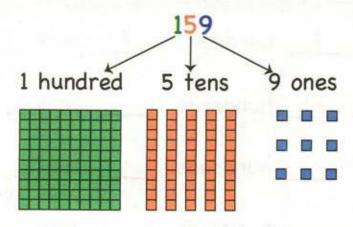

365 = \_\_\_ hundreds \_\_\_ tens \_\_\_ ones

430 = \_\_\_ hundreds \_\_\_ tens \_\_\_ ones

#### Count and write hundreds, tens and ones.

How many hundreds, tens and ones are in 159?

There is 1 hundred, 5 tens and 9 ones in 159.

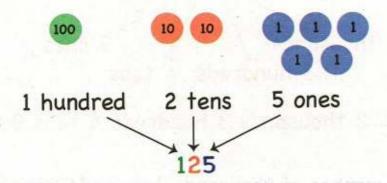

Write separately hundreds, tens and ones.

485

Ali has 3 coins. The number on the coin shows it's face value.

- One
- 10 Ten
- 100 Hundred

Look at this example.

1 hundred 2 tens 5 ones = 125

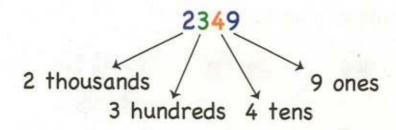

Count hundreds, tens and ones. Write the number.

	Hundreds	Tens	Ones	Number
100 100 100 10 10	3	2	1	321
100 100 10 10 1 1				3.4
100 100 100 10 1 1			18	18

Ali has 10 coins of one hundred each.

Group of 10 hundreds = 1 thousand

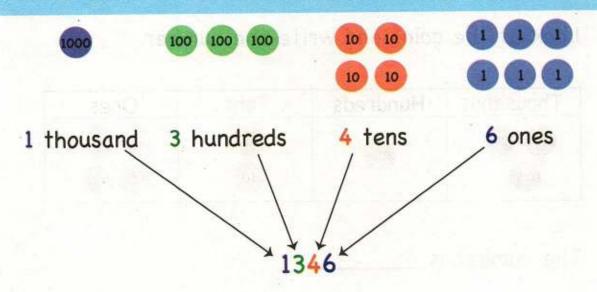

2349 = 2 thousands 3 hundreds 4 tens 9 ones

Write the number of thousands, hundreds, tens and ones.

	Thousands	Hundreds	Tens	Ones
2917	2	9	1 910	700
4625				
5834		443	W Jew	- 100 ASI
6831	-	40 M	a di g	
8743			0 (Sa sid	121 (516

1 thousand 3 hundreds 4 tens 6 ones = 1346

Read thousands, hundreds, tens and ones. Write the number.

#### Look at the coins and write the number.

Thousands	Hundreds	Tens	Ones
1000 1000	100	10	1 1
1000	100	10	1 1

The number is \_\_\_\_\_.

Thousands	Hundreds	Tens	Ones
1000 1000	100 100 100	10 10	11
		10 10	1 1

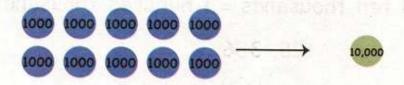

The number is \_\_\_\_\_.

Thousands Hundreds		Tens	Ones
000	100 100	10	•

The number is \_\_\_\_\_.

Sana has 10 coins of one thousand each.

Group of 10 thousands = 10,000

13 475

1 = Ten thousand

3 = Thousands

4 = Hundreds

7 = Tens

5 = Ones

#### Look at the number and complete the table.

	Ten thousands	Thousands	Hundreds	Tens	Ones
14, 357				* C4 D4	
21, 795					
45, 678				Year!	- 209
19, 276					asni

#### Remember how many tens make a hundred?

#### 10 tens = 1 hundred

How many thousands make a hundred thousand?

10 ten thousands = 1 hundred thousand

125, 386

1 = Hundred thousand

2 = Ten thousands

5 = Thousands

3 = Hundreds

8 = Tens

6 = Ones

#### Look at this number and fill in the blanks.

573, 942

 Hundred thousands = \_\_\_\_\_

 Ten thousands = \_\_\_\_\_

 Thousands = \_\_\_\_\_

 Hundreds = \_\_\_\_\_

Tens = \_\_\_\_\_

Ones = \_\_\_\_\_

We use place value to read and write numbers in words.

8, 931	Eight thousand, nine hundred and thirty one.
21, 573	Twenty one thousand, five hundred and seventy three.
138, 801	One hundred and thirty eight thousand, eight hundred and one.
Read the	number and write the word.
10, 583	
4, 192	
120, 367	
908, 561	

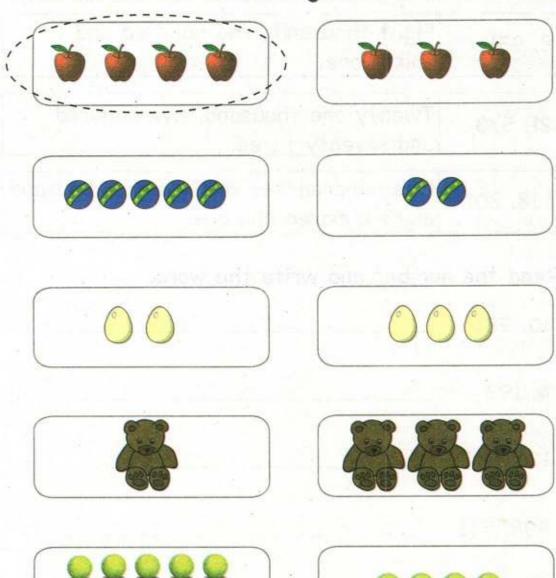

13, 741

2, 642

# Comparing numbers

Encircle the box with the greater number of objects.

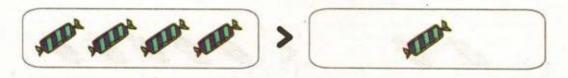

#### Which box has more sweets?

The box on the left has more sweets.

We can show this as:

greater than > lesser than <

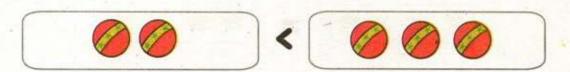

The > sign has an open side and a close side.

open side 1>1 close side

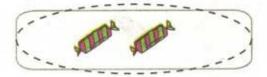

The open side faces the box that has more objects.

The close side faces the box that has lesser objects

Let's look at another example.

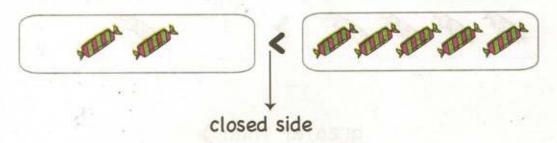

#### Which box has lesser sweets?

The box on the left has lesser sweets.

We will put the sign as:

Which box has greater number of stars?

Both boxes have 4 stars.

We use = sign
when both sides
have equal
objects

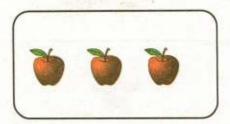

#### Let's look at a few examples.

#### Remember:

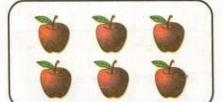

open side 1>

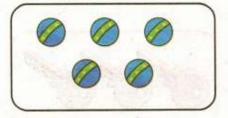

closed side 1

= equal

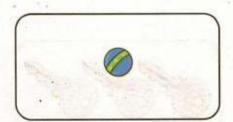

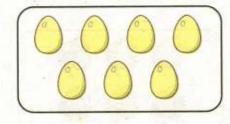

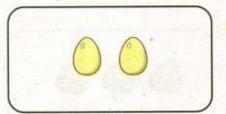

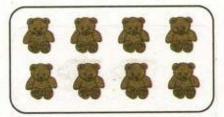

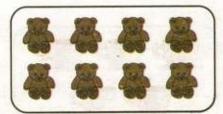

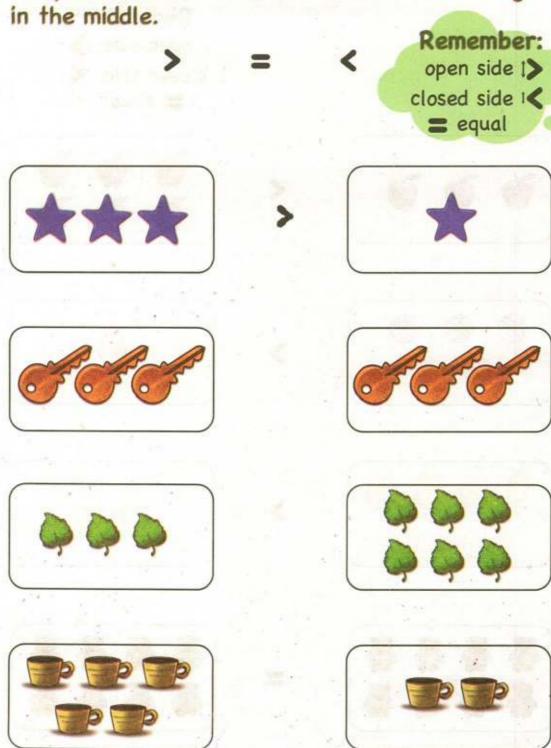

=

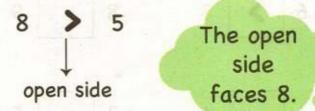

Compare the objects and write the correct sign in the middle.

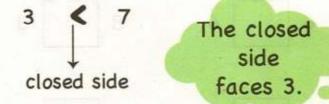

Which is the bigger number?

8 is bigger than 5. We can show this as:

Which is the smaller number?

3 is smaller than 7. We can show this as:

Which is the smaller number?

There is no smaller number. Both numbers are equal

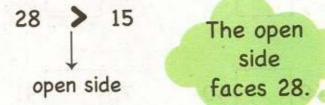

Compare the numbers and write the correct sign in the middle.

4	2
0	3

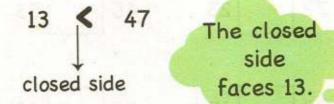

Which is the bigger number?

28 is bigger than 25. We can show this as:

Which is the smaller number?

13 is smaller than 47. We can show this as:

Which is the smaller number?

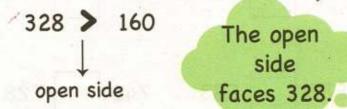

There is no smaller number. Both numbers are equi

Compare the numbers and write the correct sign in the middle.

Г	_	7
15		12

Which is the bigger number?

328 is bigger than 160. We can show this as:

Which is the smaller number?

430 is smaller than 597. We can show this as:

Which is the smaller number?

There is no smaller number. Both numbers are equal.

Compare the numbers and write the correct sign in the middle.

# Ascending and Descending Order

Look at these numbers.

#### Even and odd numbers

Ali has 8 sweets. He shares them equally into 2 groups.

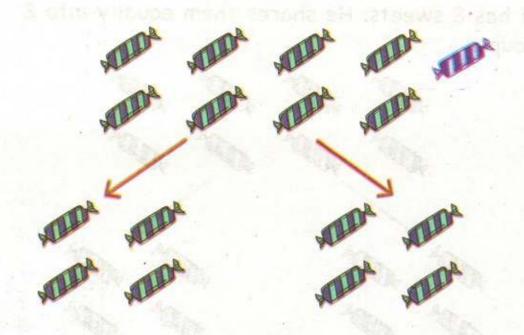

There are no sweets left. So, we can say that 8 is an even number.

A number is **even** if that number of objects can be shared **equally** into 2 groups without any left over.

Even numbers have 2, 4, 6, 8 or 0 in the ones place.

Sana has 9 sweets. She shares them equally into 2 groups.

There is 1 sweet left over. So, we can say that 9 is an odd number.

A number is **odd** if there is 1 left over after sharing that number of objects equally into 2 groups.

Odd numbers have 1, 3, 5, 7 or 9 in the ones place.

# Count the objects and tell whether they are even or odd.

****	even	odd
	even	odd

# Encircle the even numbers.

20	51	43	38	97
	10	oi bi	03	3891
66	18	4	93	80

# Encircle the odd numbers.

17	19	24	31	47
65	20	42	78	94

# Addition

Find the sum of 23 and 16.

2	3
1	6
	2

# Step 1: Add ones

Tens	Ones
10 10	1 1
10	

#### Step 2: Add tens

Tens	Ones
10 10 10	1 1 1
	1 1 1
Predmin b	1 1 1

The sum of 23 and 16 is 39.

# Add the following numbers.

	Tens	Ones
	6	1
+	1	3

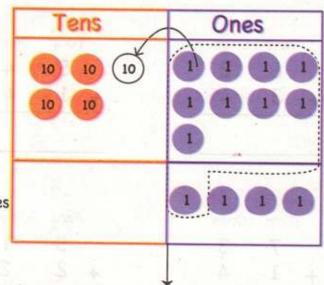

Find the sum of 49 and 4.

	Tens	Ones
	4	9
+		4

Step 1: Add ones

Tens 14	Ones 9
+	4
	3

13 ones = 1 ten 3 ones We carry 1 ten to the tens side

Step 2: Add tens

Tens	Ones
10 10 10	

# Add the following numbers.

Tens	Ones
2	4
+	8

Tens	Ones
5	9
+	8
	12/2

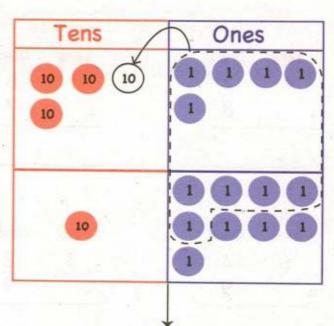

Find the sum of 35 and 19.

	Tens	Ones
	3	5
+	1	9

Step 1: Add ones

	Tens	Ones
	1 3	5
+	1	9
		4

14 ones = 1 ten 4 ones We carry 1 ten to the tens side.

Step 2: Add tens

Tens	Ones
10 10 10	
7.7.1	

Add the following numbers.

-	Tens	Ones
	4	8
+	1	2
-		_

	Tens	Ones
	3	3
+	1	8
-	0 1	1 10

# Find the sum of 120 and 93.

# Step 1: Add ones

# Step 2:

Add tens

11 tens = 1 hundred 1 ten We carry 1 hundred to the hundreds side

## Step 3:

Add hundreds

Hundreds	Tens	Ones
100	10 10	SLA
	10 10 10	00
T. S	10 10 10	3
0 - 1	10 10 10	3 4

Hundreds	Tens	Ones
100 (100)	10 10	
	10 10 10	00
	10 10 10	1

Hundreds	Tens	Ones
100 100	10	1

Add these numbers. Remember that H stands for hundreds, T for tens and O for ones.

Find the sum of 257 and 364.

#### Step 1: Add ones

7 + 4 = 11
11 ones = 1 ten 1 one
We carry 1 ten to the
tens side.

# Step 2:

Add tens

5 + 6 + 1 = 12 12 tens = 1 hundred 2 tens We carry 1 hundred to the hundreds side.

# Step 3:

Add hundreds

# Add the following numbers.

	H	T	0
	3	7	5
+	4	5	2

Find the sum of 1023 and 1564.

# Step 1:

Add ones

	Th	H	T	0
	1	0	2	3
+	1	5	6	4
	98			7

# Step 2:

Add tens

# Step 3:

Add hundreds

# Step 4:

Add thousands

Add the following numbers. We can write Th for thousands, H for hundreds, T for tens, O for ones.

	Th	H	T	0
	1	2	8	3
_+	2	5	1	3

Find the sum of 1253 and 4936.

# Step 1:

Add ones

# Step 2:

Add tens

#### Step 3:

Add hundreds

11 hundreds = 1 thousand
1 hundred
We will carry 1 thousand to
the thousands side.

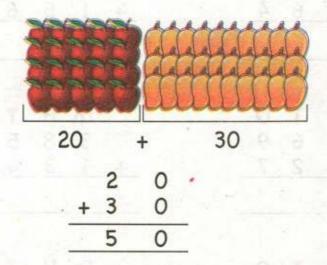

Step 4: Add thousands

Add the following numbers. Remember that Th stands for thousands, H for hundreds, T for tens, O for ones.

	Th	H	T	0
	3	8	2	5
+	2	5	6	4

# Addition problems in daily life

There are 20 apples and 30 mangoes on Ahmed's cart. How many fruits are there altogether?

There are 50 fruits altogether.

Sana had 427 beads. Her mother gave her another 258 beads. How many beads did Sana have altogether?

Sana had 685 beads altogether.

There are 29 boys and 13 girls in Class 3. How many students are there altogether?

2 Ahmed got 180 marks in his Math test and 215 marks in his English test. How many marks did he get altogether?

3 Pakistan scored 320 runs in a cricket match. India scored 285 runs. How many total runs were scored in the match?

Bashir sold 68 oranges on Monday and 103 oranges on Tuesday. How many oranges did he sell altogether?

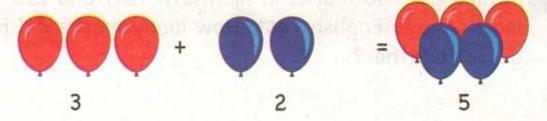

5 Ali got Rs. 132 on Eid. Hamza got Rs. 95 on Eid. How much money did both Ali and Hamza get on Eid?

#### More about addition

Ali bought 3 red balloons and 2 blue balloons.

How many balloons does Ali have?

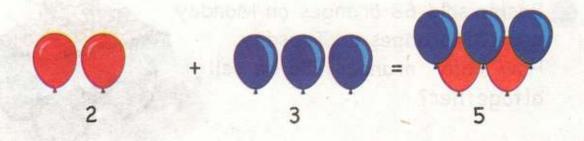

Ali has 5 balloons.

Sana bought 2 red balloons and 3 blue balloons.

How many balloons does Sana have?

Sana has 5 balloons.

$$3 + 2 = 5$$
  $2 + 3 = 5$   $3 + 2 = 2 + 3$ 

We can write 3 + 2 or 2 + 3. The answer remains 5.

# How many fruits are there?

8 oranges and 1 apple make 9.

1 orange and 8 apples make 9.

How many sweets are there?

3 blue sweets and 4 pink sweets make 7.

4 blue sweets and 3 pink sweets make 7.

How many balls are there?

2 pink balls and 4 blue balls make 6.

4 pink balls and 2 blue balls make 6.

# Fill in the blanks with the correct answer.

$$2 + 5 =$$
 and  $5 + 2 =$ 

$$6 + 3 = -$$
 and  $3 + 6 = -$ 

$$8 + 1 =$$
 and  $1 + 8 =$ 

$$7 + 9 =$$
 and  $9 + 7 =$ 

#### Fill in the blanks with the correct answer.

# Mental addition

Find the sum of 12 and 26.

$$12 = 10 + 2$$

$$26 = 20 + 6$$

Add the ones 
$$2 + 6 = 8$$

$$30 + 8 = 38$$

Do mental math and add the following numbers.

$$15 + 10 =$$

$$32 + 12 =$$

$$17 + 21 =$$

# Subtraction

- 3 There were 43 apples on a tree. 12 apples fell down. How many apples were left on the tree?
- 4 Haris had 153 coins. He gave away 32 coins to his brother. How many coins were left with Haris?
- Sana had 377 candles. She used 240 of them. How many candles were left with Sana?
- 6 There are 345 people in a hall. 132 go out. How many people are left inside the hall?
- 7 Irfan had 175 eggs. He sold 38 eggs. How many eggs were left?

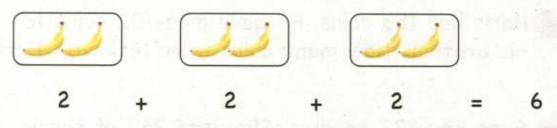

# Repeated Addition & Multiplication

Look at these examples.

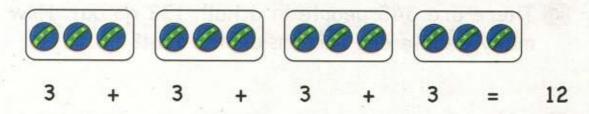

There are 2 groups.

Each group has 4 oranges.

There are 3 groups.

Each group has 2 bananas.

There are 4 groups. Each group has 3 balls.

Count the total number of groups. Count the number of objects in each group. Write the total number.

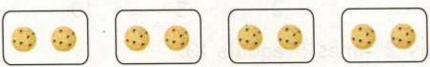

There are \_\_\_\_ groups.

Each group has \_\_\_\_\_ eggs.

There are \_\_\_\_\_ groups.

Each group has \_\_\_\_\_ biscuits.

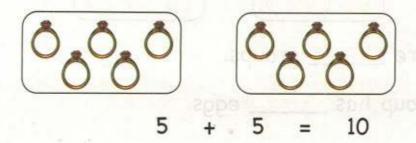

There are \_\_\_\_ groups.

Each group has \_\_\_\_ carrots.

We say 3 times 6 squals 12.

# of objects in each group write the total number

How many rings are there altogether?

There are 2 groups. Each group has 5 rings.

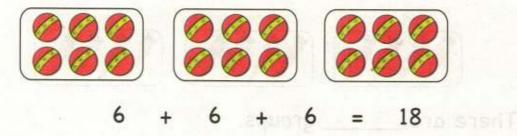

$$2 \times 5 = 10$$

We say 2 times 5 equals 10.

x is read as times.

It means to multiply.

How many balls are there altogether?

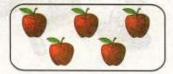

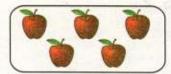

There are 3 groups. Each group has 6 balls.

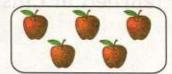

$$3 \times 6 = 18$$

We say 3 times 6 equals 18.

### Multiply the numbers.

 $3 \times 5 =$ 

We say 3 times 5 equals \_\_\_\_\_.

2 x 4 = \_\_\_\_

We say 2 times 4 equals \_\_\_\_\_.

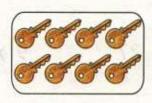

85 = 4 x 7 3 x 7 8 x 7 2 x 41 = 2 x 7

We say 3 times 7 equals \_\_\_\_\_.

2 x 8 = \_\_\_\_

We say 2 times 8 equals \_\_\_\_\_.

Let's quickly revise the tables we learned in Class 2.

Table of	2
----------	---

#### Table of 3

#### Table of 4

$$1 \times 2 = 2$$

$$1 \times 3 = 3$$

$$1 \times 4 = 4$$

$$2 \times 2 = 4$$

$$2 \times 3 = 6$$

$$2 \times 4 = 8$$

$$3 \times 2 = 6$$

$$3 \times 3 = 9$$

$$3 \times 4 = 12$$

$$4 \times 2 = 8$$

$$4 \times 3 = 12$$

$$4 \times 4 = 16$$

$$5 \times 2 = 10$$

$$5 \times 3 = 15$$

$$5 \times 4 = 20$$

$$6 \times 2 = 12$$
  $6 \times 3 = 18$ 

$$6 \times 3 = 18$$

$$6 \times 4 = 24$$

$$7 \times 2 = 14$$

$$7 \times 3 = 21$$

$$7 \times 4 = 28$$

$$8 \times 2 = 16$$

$$8 \times 3 = 24$$

$$8 \times 4 = 32$$

$$9 \times 2 = 18$$

$$9 \times 3 = 27$$

$$9 \times 4 = 36$$

$$10 \times 2 = 20$$

$$10 \times 3 = 30$$

$$10 \times 4 = 40$$

Read the table of 2 and write the answer.

Complete the table of 3.

X	1	2	3	4	5	6	7	8	9	10
3	3	6				i sai				

How many triangles are there altogether?

4 times \_\_\_\_ equals \_\_\_\_

There are \_\_\_\_ triangles altogether.

Complete the table of 4.

x	1	2	3	4	5	6	7	8	9	10
4	4	8						40		

### Let's revise the tables of 5 and 10.

#### Table of 5

#### Table of 10

$$1 \times 5 = 5$$

$$1 \times 10 = 10$$

$$2 \times 5 = 10$$

$$3 \times 5 = 15$$

$$3 \times 10 = 30$$

$$4 \times 5 = 20$$

$$4 \times 10 = 40$$

$$5 \times 5 = 25$$

$$6 \times 5 = 30$$

$$7 \times 5 = 35$$

$$7 \times 10 = 70$$

$$8 \times 5 = 40$$

$$8 \times 5 = 40$$
  $8 \times 10 = 80$ 

$$9 \times 5 = 45$$

$$10 \times 5 = 50$$

$$10 \times 10 = 100$$

Read the table of 5 and write the answer.

$$2 \times 5 =$$
  $5 \times 5 =$   $7 \times 5 =$ 

Complete the table of 5.

X	1	2	3	4	5	6	7	8	9	10
5	5	10								

How many butterflies are there altogether?

2 times \_\_\_\_ equals \_\_\_\_

There are \_\_\_\_ butterflies altogether.

Complete the table of 10.

X	1	2	3	4	5	6	7.	8	9	10
10	10	20								

# Multiplication Table of 6

$$1 \times 6 = 6$$

$$2 \times 6 = 12$$

$$3 \times 6 = 18$$

$$4 \times 6 = 24$$

$$5 \times 6 = 30$$

$$6 \times 6 = 36$$

$$7 \times 6 = 42$$

$$8 \times 6 = 48$$

$$9 \times 6 = 54$$

$$10 \times 6 = 60$$

# Multiplication Table of 7

$$1 \times 7 = 7$$

1 times 7 equals 7

$$2 \times 7 = 14$$

2 times 7 equals 14

$$3 \times 7 = 21$$

3 times 7 equals 21

$$4 \times 7 = 28$$

4 times 7 equals 28

$$5 \times 7 = 35$$

5 times 7 equals 35

$$6 \times 7 = 42$$

6 times 7 equals 42

$$7 \times 7 = 49$$

7 times 7 equals 49

$$8 \times 7 = 56$$

8 times 7 equals 56

$$9 \times 7 = 63$$

9 times 7 equals 63

$$10 \times 7 = 70$$

10 times 7 equals 70

### Write the total number of objects.

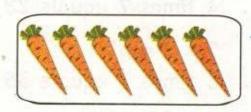

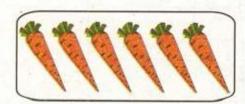

There are 4 groups. Each group has 7 stars.

4 times 7 equals \_\_\_\_\_.

There are 2 groups. Each group has \_\_\_\_ carrots.

2 times 6 equals \_\_\_\_\_

### Complete the table of 7.

X	1	2	3	4	5	6	7	8	9	10
7	7	14	4	à la			847			

## Multiplication Table of 8

$$1 \times 8 = 8$$

1 times 8 equals 8

$$2 \times 8 = 16$$

2 times 8 equals 16

$$3 \times 8 = 24$$

3 times 7 equals 21

$$4 \times 8 = 32$$

4 times 7 equals 28

$$5 \times 8 = 40$$

5 times 8 equals 40

$$6 \times 8 = 48$$

6 times 8 equals 42

$$7 \times 8 = 56$$

7 times 8 equals 56

$$8 \times 8 = 64$$

8 times 8 equals 64

$$9 \times 8 = 72$$

9 times 8 equals 72

$$10 \times 8 = 80$$

10 times 8 equals 80

# Multiplication Table of 9

$$1 \times 9 = 9$$

1 times 9 equals 9

$$2 \times 9 = 18$$

2 times 9 equals 18

$$3 \times 9 = 27$$

3 times 9 equals 27

$$4 \times 9 = 36$$

4 times 9 equals 36

$$5 \times 9 = 45$$

5 times 9 equals 45

$$6 \times 9 = 54$$

6 times 9 equals 54

$$7 \times 9 = 63$$

7 times 9 equals 63

$$8 \times 9 = 72$$

8 times 9 equals 72

$$9 \times 9 = 81$$

9 times 9 equals 81

$$10 \times 9 = 90$$

10 times 9 equals 90

Read the table of 8 and write the answer.

Complete the table of 8.

×	1	2	3	4	5	6	7	8	9	10
8	8	16								

How many leaves are there altogether?

There are 4 groups. Each groups has \_\_\_\_\_ leaves.

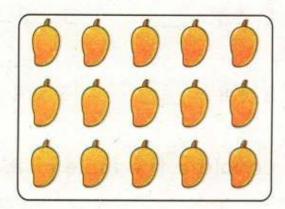

4 times 9 equals \_\_\_\_\_\_.

Complete the table of 9.

### More about Multiplication

Look at this picture.

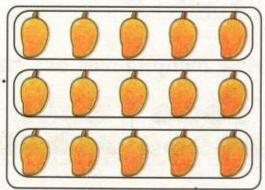

We can describe this picture in 2 ways.

There are 3 groups.

Each group has 5 mangoes.

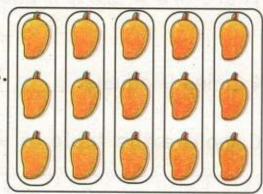

$$3 \times 5 = 15$$

There are 5 groups.

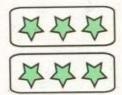

Each group has 3 mangoes.

$$5 \times 3 = 15$$

$$5 \times 3 = 3 \times 5$$

Let's look at some other examples.

There are 2 groups.

Each group has 3 stars.

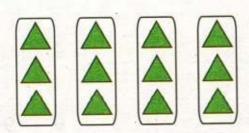

$$2 \times 3 = 6$$

There are 3 groups.

Each group has 2 stars.

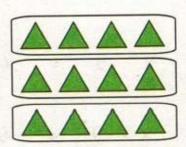

$$3 \times 2 = 6$$

There are 4 groups.

Each group has 3 triangles.

$$4 \times 3 = 12$$

There are 3 groups.

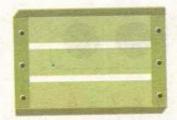

Each group has 4 triangles.

$$3 \times 4 = 12$$

# Complete the blanks.

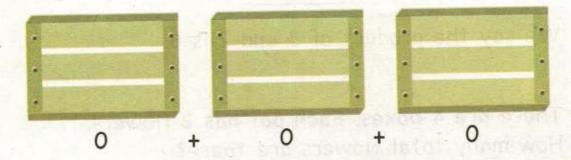

$$4 \times 5 = 20 \text{ so } \underline{5} \times \underline{4} = 20$$

Look at this box. Are there any apples?

There are 0 apples.

What if we have three such boxes? How many apples do we have then?

We still have 0 apples.

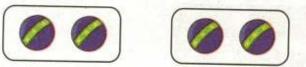

$$3 \times 0 = 0$$

If we multiply anything by 0, the answer is still 0.

Complete the following.

There are 3 boxes. Each box has 2 balls.

 $3 \times 2 = 6$ 

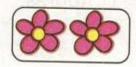

We can also write this as:

We say the product of 3 and 2 is 6.

There are 4 boxes. Each pot has 2 flowers. How many total flowers are there?

$$4 \times 2 = 8$$

We can also write this as:

We say the product of 4 and 2 is 8.

Multiply the numbers and write the correct answer.

There are 30 balls altogether.

## Multiplication problems in daily life

Ahmed has 6 sweets. Sana has also 6 sweets. How many sweets do they have in total?

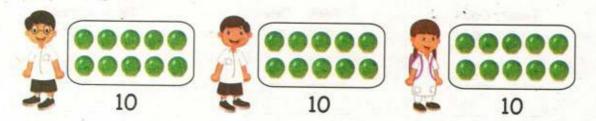

Sana has 6 sweets.

There are 2 children. Each child has 6 sweets.

$$2 \times 6 = 12$$

Ahmed and Sana have 12 sweets in total.

Hassan, Ali and Zara have 10 balls each. How many balls are there altogether?

There are 3 children. Each child has 10 balls.

$$3 \times 10 = 30$$

There are 30 balls altogether.

1 Ali has 2 bags. Each bag has 3 apples How many apples does he have altogether?

- Sana drinks 2 glasses of milk everyday. How many glasses does she drink in 4 days?
- 3 The price of a pencil is Rs. 5. Hamza buys 8 pencils. What is the total cost that he pays?
- Ahmed has 8 books. Sana has 8 books. How many books do they have altogether?

5 There are 2 trees.
Each tree has 5 birds sitting on it.
How many birds are there altogether?

## Repeated Subtraction & Division

3 apples How many apples

smother has 9 biscuits.

Sansedrinks 2 glasses of milk everyday. How many glasses does she drink in 4 days?

She gives 3 biscuits to Ali.

he price of a pencil is Rs. 3 Hognzopbuys pencils. What is the total cost that he and the sand and

Ahmed has 8 booksanbenotheriustidessavigvand

gargebooks do they have altogether?

6 - 3 = 3

There are 2 trees. . the discussion of the same of the

3 - 3 = 0

Each tree has 5 birds sitting on it.

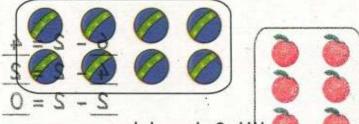

How many birds are there stiused & savig she

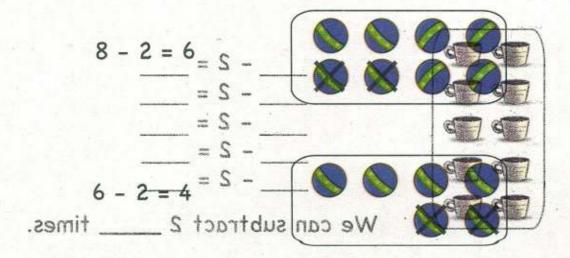

She has 0 biscuit left.

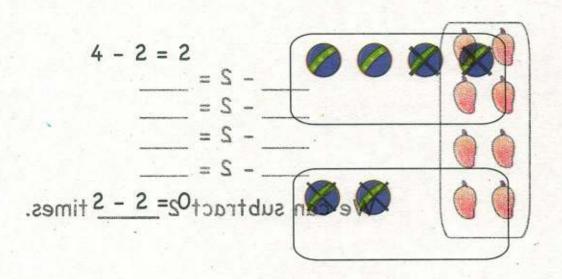

This is called repeated subtraction.

Count the objects. Subtgastt2nframdthematilgastt

How many times can we subtract 2 till we are light the can subtract ? ?0 this first

We can subtract 2 four times.

Count the objects. Subtract 2 from them till you are left with 0.

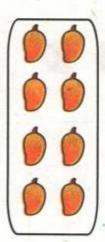

$$\begin{array}{c|c}
6 - 2 = 4 \\
\hline
4 - 2 = 2 \\
\hline
2 - 2 = 0
\end{array}$$

We can subtract 2 \_\_\_\_ times.

We can subtract 2 \_\_\_\_ times.

We can subtract 2 \_\_\_\_ times.

ATT TOOL S TONT OUR ADD SW

### Division

Ali has 6 balls.

He puts them equally into 2 boxes.

$$6 \div 2 = 3$$

6 divided by 2 is equal to 3.

There are 3 balls in each box.

is read as divided by.
stands for division.

Now, Ali puts the balls equally into 3 boxes.

$$6 \div 3 = 2$$

6 divided by 3 is equal to 2.

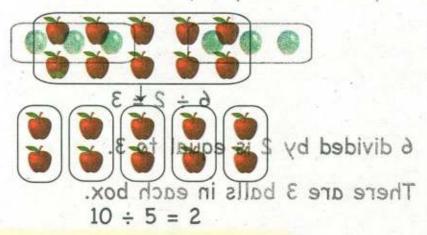

There are 2 balls in each box.

There are 10 apples moie boil

We want to divide them equally in 5 boxes.

Ali has 6 balls.

How many apples can we put in each box? He puts them equally into 2 boxes.

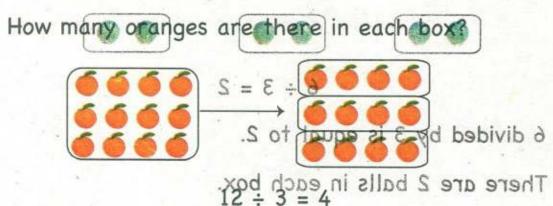

+ is reads of divided by yet belivib 01 + stands for division.

\* stands for division.

We can put 2 apples in a box.

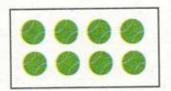

Now, Ali puts the balls and sagnara & 12 ara arant

12 divided by 3 is equal to 4. We can put 4 oranges in each box.

## Divide the objects and write the correct answer.

She warts 8 to Pat them equally in 3 boxes. 4 : 8

cuits will she put in each box 15 ÷ 3 = ?

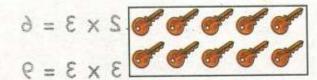

Recall the table of 3.

27 ÷ 3 = \_\_\_\_

$$1 \times 3 = 3$$

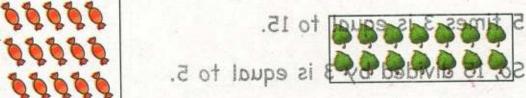

$$= 2 \div 01$$

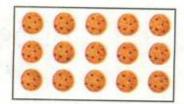

Anam  $c\bar{a}n^{7}p\dot{a}t^{4}$  biscuits in each box. =  $\bar{c}$  ÷  $\bar{c}$ 1

Anum made 15 biscuits.

She wants to put them equally in 3 boxes.

How many biscuits will she put in each box?

$$15 \div 3 = ?$$

Recall the table of 3.

$$1 \times 3 = 3$$
.

$$2 \times 3 = 6$$

$$3 \times 3 = 9$$

$$4 \times 3 = 12$$

$$5 \times 3 = 15$$

5 times 3 is equal to 15.

So, 15 divided by 3 is equal to 5.

$$15 \div 3 = 5$$

Anum can put 5 biscuits in each box.

#### Divide these numbers.

#### Divide 28 by 2.

Divide these numbers.

= 4 ÷ 8

$$= 2 \div 2 = 2 \div 3 = 2 \div 4$$

Step 1:

Write the division sum like this.

Step 2:

Start from the left side. Divide 2 by 2.

Step 3: 
$$9 \div 99 = 8 \div 40 = 7 \div 38$$
Divide 8 by 2.

$$\frac{1}{2} + \frac{4}{2} + \frac{1}{2} = 8 \div 57$$

$$\frac{1}{2} \times 4 = 8 \Rightarrow 50,$$

$$28 \div 2 = 14$$

Divide 75 by 5.

Divide these numbers.

Step 1: Wrftethe division sumdifie Phis.

Step 3: Divide 25 by 5.

$$5 \times 5 = 25 \text{ so,}$$
 $25 \div 5 = 5$ 

$$75 \div 5 = 15$$

Divide 75 by 5.

$$75 \div 5$$

Step 1:

Write the division sum like this.

Step 2:

Start from the left side. Divide 7 by 5.

We cannot divide 7 equally by 5. We will be left with 2.

Step 3: Divide 25 by 5.

$$5 \times 5 = 25$$
 so,  $25 \div 5 = 5$ 

$$75 \div 5 = 15$$

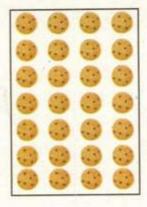

## Divide these numbers

## Division problems in daily life

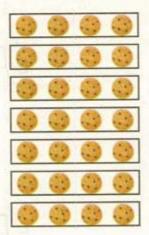

There are 28 biscuits. The biscuits are put equally in 7 boxes. How many biscuits are put in each box?

$$28 \div 7 = ?$$

There are 28 biscuits.

The biscuits are put equally into 7 boxes.

There are 4 biscuits in each box.

$$28 \div 7 = 4$$

1 Miss Amna has 14 sweets.
She divides them equally between
Ali and Sana. How many sweets
do each Ali and Sana get?

2 Ahmed has 18 balls. He puts the balls equally into 2 boxes. How many balls does he put in each box?

3 There are 30 pencils. Each student gets 3 pencils.
How many students are in the class?

4 There are 24 balloons. Each child gets 8 balloons. How many children are there?

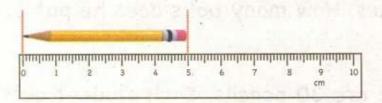

5 There are 48 toffees in a pack. They are divided equally among 8 children. How many toffees does each child get?

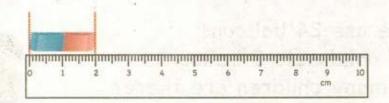

## Measuring length

Ahmed and Sana want to measure the length of different objects.

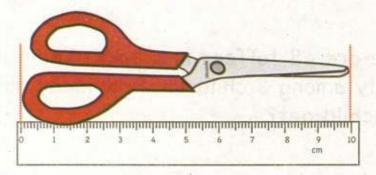

They can use a ruler and measure the length in centimetres. We can write centimetres as cm.

The pencil is 5 cm long.

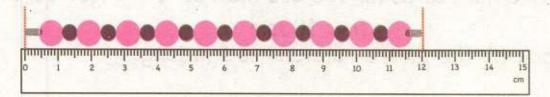

The eraser is 2 cm long.

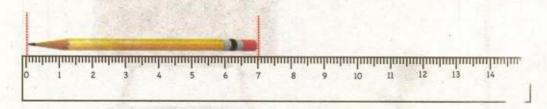

The scissors are 10 cm long.

We use centimetres for shorter objects.

Measure the length of the following objects.

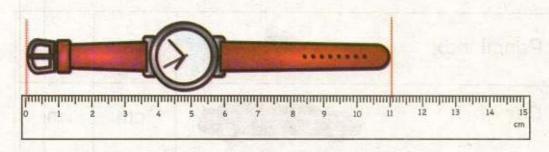

The length of the necklace is \_\_\_\_ cm.

The length of the pencil is \_\_\_\_\_ cm.

The length of the nail is \_\_\_\_ cm.

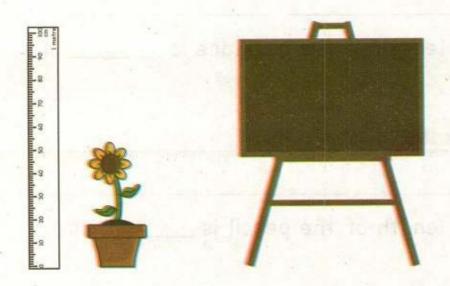

The length of the watch is \_\_\_\_ cm.

We can also measure length in metres. We can write metres as m. We use metres for longer objects.

1m = 100cm

Look at the metre ruler. It is 1 m long.

The plant is less than 1 m.

The blackboard is almost 1 m tall.

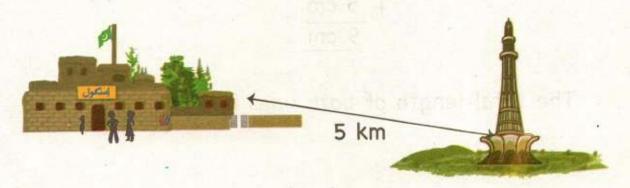

Look at the objects. Tell whether you will use metres or centimetres to measure them.

Pencil box	6	cm	m
Car		cm	m

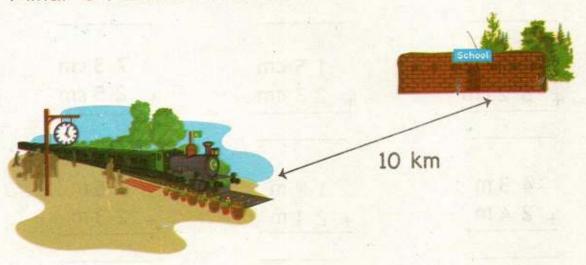

Kilometres is another unit of length. We can write kilometres as km.

1km = 1000m

Kilometres is used to measure distances from one place to another.

The distance between Ali's school and Minar-e-Pakistan is 5 km.

The distance between Sana's school and the railwa station is 10 km.

Ahmed draws a line. It is 4 cm long. Hamza draws a line. It is 5 cm long. What is the total length of both lines?

The total length of both lines is 9 cm.

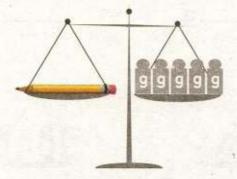

#### Add the lengths.

## Measuring Mass

Remember the units we used to measure mass.

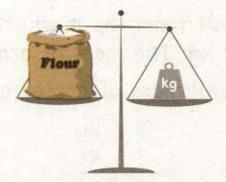

1kg = 1000g

Zara wants to find the mass of the pencil.

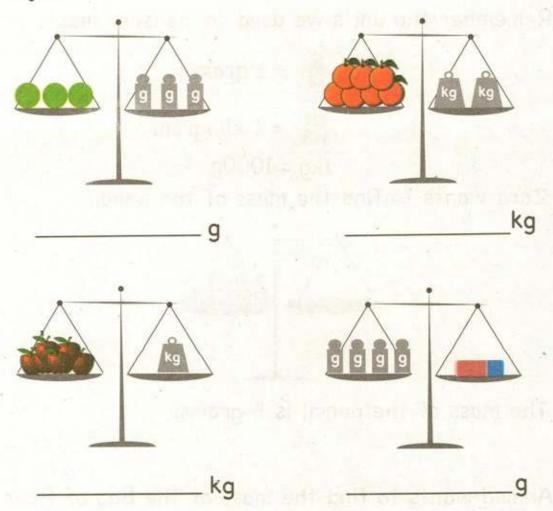

The mass of the pencil is 5 grams.

Ahmed wants to find the mass of the bag of flour.

The mass of a bag of flour is 1 kilogram.

Look at the pictures. Write the mass of each object.

Ahmed buys fruit from the market. The mass of the apples is 2 kg. The mass of oranges is 3 kg. What is the total mass of apples and oranges?

The total mass of the apples and oranges is 5 kg.

#### Add the mass of objects.

#### Subtract the mass of objects.

## Measuring Capacity

Look at the pot. How many glasses of water can it hold?

This pot can hold 5 glasses of water.

We can also use a standard unit of measurement to measure capacity.

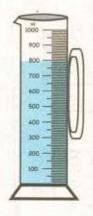

**Litre** is the standard unit of measurement used to measure capacity. We can write it as L.

Millilitres is also a standard unit of measurement used to measure capacity. We can write it as mL.

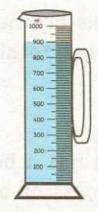

1L = 1000ml

Look at this jug.

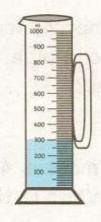

This has 800 mL of water.

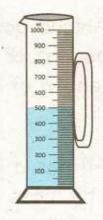

Look at the measuring jug. Write the amount of water in the jug.

mL

mL

\_\_\_\_\_ mL

Add the mass of objects.

Subtract the mass of objects.

## Measurement Problems in Daily Life

- 1 Ahmed bought 57 metres long pipe. His brother bought 18 metres long pipe. What is the total length of both pipes?
- 2 Ali has a ball. It's mass is 40 g. Sana has a ball. It's mass is 35 g. What is the total mass of both balls?
- 3 Ali drank 2 litres of water. Sana drank 3 litres of water. How many litres did they drink altogether?
- The distance from Ali's house to the hospital is 20 km. The distance from the hospital to the park is 35 km. What is the sum of both distances?
- 5 My father bought 10 kg flour and 5 kg sugar. What is the total mass of both flour and sugar?

#### Fractions

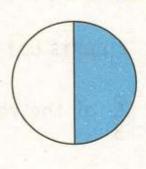

Look at the circle.

It is divided into 2 equal parts.

1 part out of 2 is coloured

 $\frac{1}{2}$  of the circle is coloured.

The circle is divided into 4 equal parts.

1 part out of 4 is coloured.

 $\frac{1}{4}$  of the circle is coloured.

The circle divided into 3 equal parts.

1 part out of 3 is coloured.

 $\frac{1}{3}$  of the circle is coloured.

 $\frac{1}{2}$ ,  $\frac{1}{4}$  and  $\frac{1}{3}$  are examples of fractions.

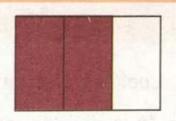

A fraction shows a part of a whole that is cut into equal parts.

Look at the rectangle.

It is divided into 3 equal parts

 $\frac{2}{3}$  of the rectangle is coloured.

The square is divided into 4 equal parts.

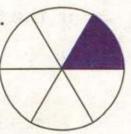

$$\frac{3}{4}$$
 of the square is coloured.

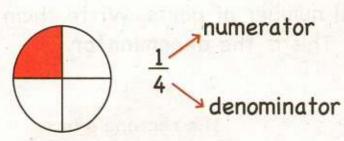

The circle is divided into 6 equal parts.

1 part out of 6 is coloured.

 $\frac{1}{6}$  of the square is coloured.

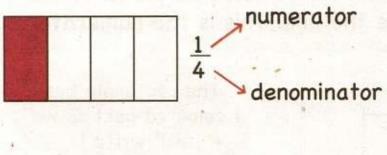

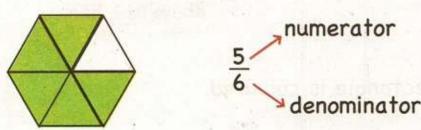

#### A fraction has 2 parts.

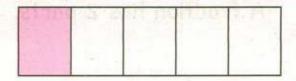

A numerator shows the number of equal parts of a whole that are coloured.

A denominator shows the number of equal parts the whole is divided into.

Look at the rectangle. What fraction of the rectangle is coloured?

Count the total number of parts. Write them under the line. This is the denominator.

facing to tal 5 and

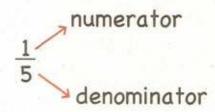

The rectangle has 5 parts so we will write 5 under the line.

Count the number of coloured parts. Write them above the line. This is the numerator.

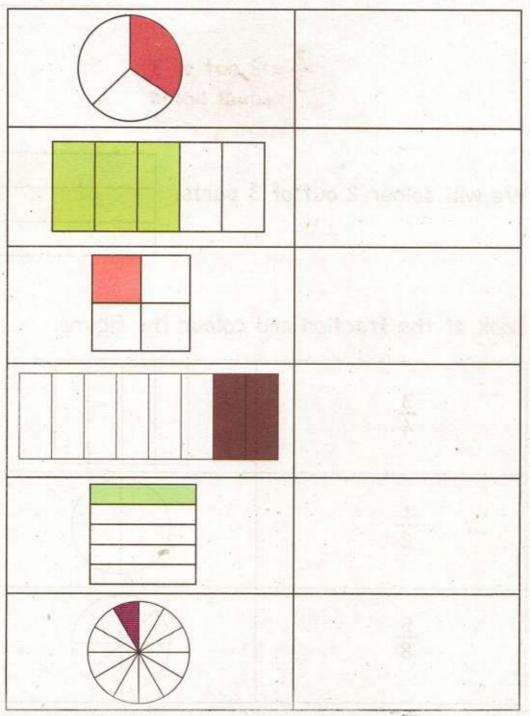

5

The rectangle has
1 coloured part so we
will write 1
above the line.

 $\frac{1}{5}$  of the rectangle is coloured.

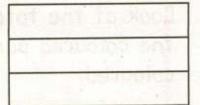

Look at the total number of parts. Then look at the coloured part. Write the fraction that is coloured.

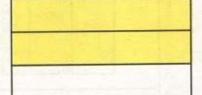

Look at the rectangle.

Colour  $\frac{2}{3}$  of the rectangle.

 $\frac{2}{3}$  = 2 out of 3 equal parts

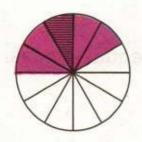

We will colour 2 out of 3 parts.

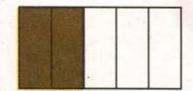

Look at the fraction and colour the figure.

3 4	
1/2	
5 8	

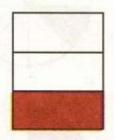

## Match the fraction with the correct figure.

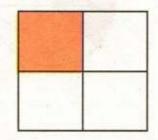

8 of ni solaa sen tu 1 3

<u>5</u>12

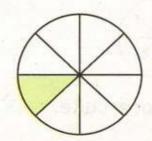

1 4

 $\frac{1}{8}$ 

Who are more cake?

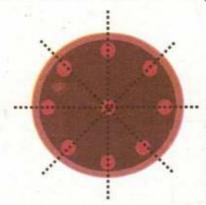

5

## **Comparing Fractions**

It is Ali's birthday.

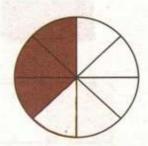

Ali's mother cut the cake into 8 equal pieces.

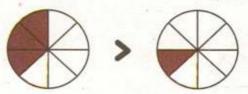

Sana ate 1 piece. We can say that she ate  $\frac{1}{8}$  of the cake.

Ali ate 3 pieces. We can say that he ate  $\frac{3}{8}$  of the cake.

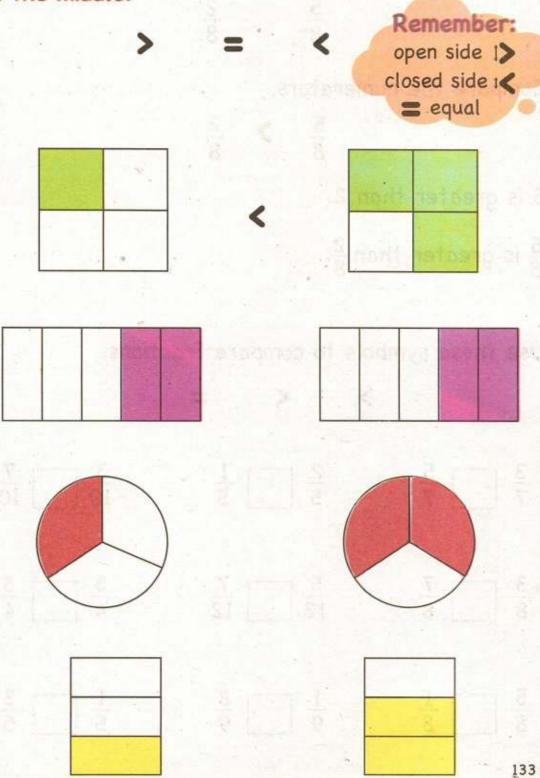

Who ate more cake?

 $\frac{3}{8}$  is greater than  $\frac{1}{8}$  so Ali ate more cake.

Compare the fractions and write the correct sign in the middle.

Which fraction is greater?

Compare the numerators.

5 is greater than 2.

$$\frac{5}{8}$$
 is greater than  $\frac{2}{8}$ 

Use these symbols to compare fractions.

$$\frac{3}{7}$$
  $\frac{5}{7}$ 

$$\frac{2}{5}$$
  $\frac{1}{5}$ 

$$\frac{3}{10}$$
  $\frac{7}{10}$ 

$$\frac{3}{8}$$
  $\frac{7}{8}$ 

$$\frac{5}{12}$$
  $\frac{7}{12}$ 

$$\frac{3}{4}$$
  $\frac{3}{4}$ 

$$\frac{5}{8}$$
  $\frac{1}{8}$ 

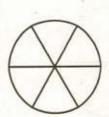

$$\frac{1}{9}$$
  $\frac{8}{9}$ 

$$\frac{1}{5}$$
  $\frac{3}{5}$ 

## Addition and Subtraction of Fractions

Ali's mother makes a pizza.

She divides the pizza into 6 parts.

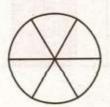

Sana eats  $\frac{1}{6}$  of pizza.

Ali eats  $\frac{1}{6}$  of pizza.

$$\frac{1}{6}$$

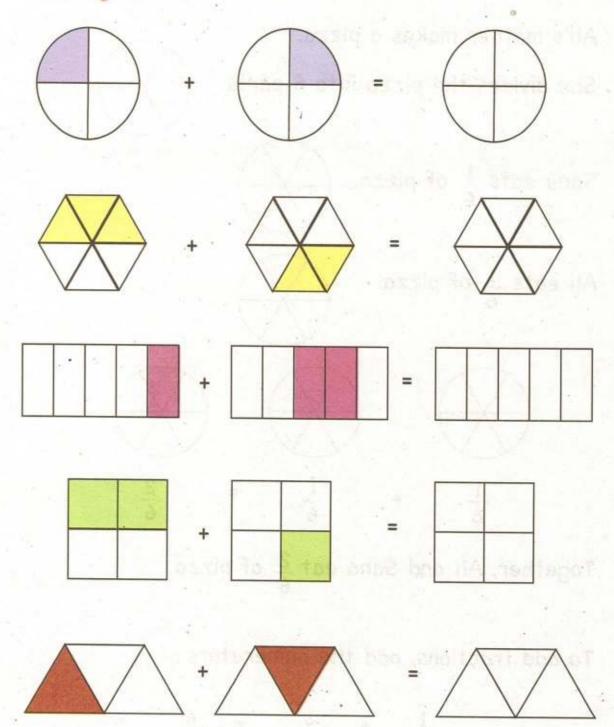

Together, Ali and Sana eat  $\frac{2}{6}$  of pizza.

To add fractions, add the numerators.

$$\frac{1}{5} + \frac{3}{5} = \frac{4}{5}$$

# Look at the figures. Add the fraction and colour the figure.

#### Add the fraction and write the correct answer.

$$\frac{2}{5}$$
 +  $\frac{1}{5}$  =

$$\frac{1}{6} + \frac{3}{6} =$$

$$\frac{7}{12} + \frac{3}{12} =$$

$$\frac{4}{10} + \frac{2}{10} =$$

$$\frac{7}{11}$$
 +  $\frac{1}{11}$  =

$$\frac{4}{9} + \frac{2}{9} =$$

$$\frac{3}{8} + \frac{1}{8} =$$

$$\frac{2}{10} + \frac{7}{10} =$$

$$\frac{2}{7} + \frac{4}{7} =$$

$$\frac{3}{7} + \frac{1}{7} =$$

to subtract fractions, sufficient the m

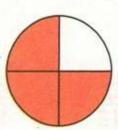

$$\frac{11}{20} + \frac{7}{20} = \frac{10}{17} + \frac{2}{17}$$

$$\frac{10}{17} + \frac{2}{17} =$$

Look at the circle. It has 4 equal parts.

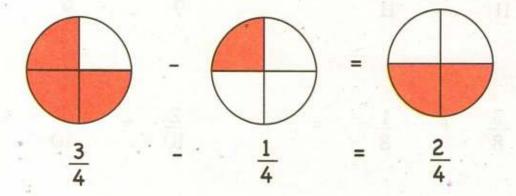

Ali colours  $\frac{3}{4}$  of the circle.

He then erases colour from  $\frac{1}{4}$  of the circle.

What fraction is left coloured?

 $\frac{2}{4}$  of the circle is left coloured.

To subtract fractions, subtract the numerators.

$$\frac{5}{7}$$
 -  $\frac{1}{7}$  =  $\frac{4}{7}$ 

Look at the figures. Subtract the fraction and colour the remaining figure.

## Subtract the fraction and write the correct answer.

$$\frac{8}{13} - \frac{4}{13}$$

$$\frac{4}{7} \quad - \quad \frac{2}{7} \quad = \quad$$

$$\frac{4}{9}$$
 -  $\frac{1}{9}$  =

$$\frac{12}{19} - \frac{6}{19} =$$

$$\frac{6}{10} - \frac{2}{10} =$$

$$\frac{7}{11}$$
 -  $\frac{5}{11}$  =

$$\frac{3}{9} - \frac{1}{9} =$$

$$\frac{5}{12}$$
 -  $\frac{1}{12}$  =

$$\frac{5}{9} - \frac{3}{9} =$$

$$\frac{9}{13}$$
 -  $\frac{5}{13}$  =

$$\frac{8}{17}$$
 -  $\frac{3}{17}$  =

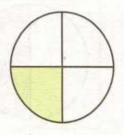

$$\frac{8}{15}$$
 -  $\frac{4}{15}$  =

## **Equivalent Fractions**

Ali makes a circle.

He divides the circle into 4 parts.

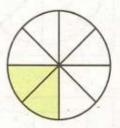

He colours  $\frac{1}{4}$  of the circle.

Sana makes a circle.

She divides the circle into 8 parts.

She colours  $\frac{2}{8}$  of the circle.

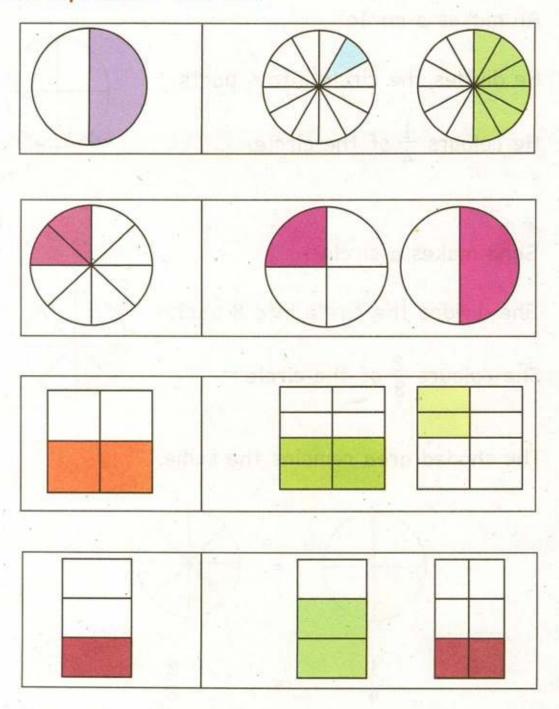

The shaded area remains the same.

$$=\frac{1}{4} = \frac{2}{8}$$

These are known as equivalent fractions.

Look at the fraction. Look at the options. Tick the equivalent fraction.

### Time

A clock tells us the time.

It has a minute hand and an hour hand.

The longer hand is the minute hand. It shows us the minutes.

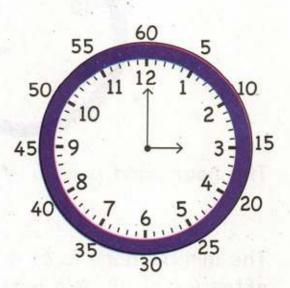

The shorter hand is the hour hand. It shows us the hours.

Each small marking on the clock stands for 1 minute.

There are 60 markings on the clock.

There are 60 minutes in 1 hour.

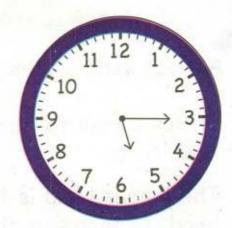

Look at this clock.

The hour hand is at 5.

The minute hand is at 3.

This means it is 15 minutes after 5 o'clock.

Look at this clock.

The hour hand is at 6. We write 6 on the left side.

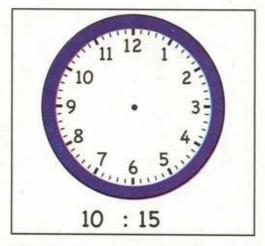

6:

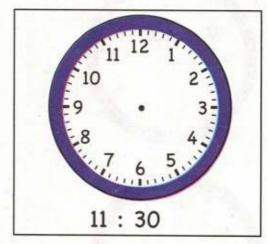

The minute hand is at 4. This means it is 20 minutes after 6 o'clock. We write 20 on the right hand side.

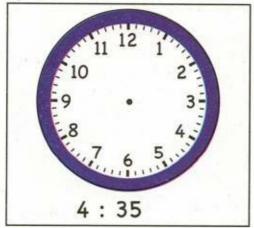

6:20

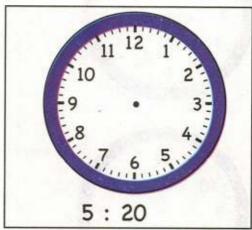

We read this as six twenty.

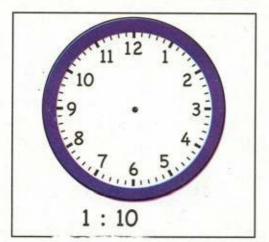

## Read the time. Make hands on the clock.

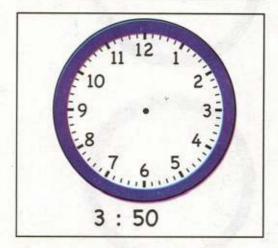

## Match the time with the correct clock.

8:50

12:05

2:00

11:20

Hamza and Sana are at the school.

The time is 8 a m.

We use a.m. to talk about time just after 12 at night to just before 12 in the morning.

Hamza and Sana are eating dinner.

The time is 8 p m.

We use p.m. to talk about time just after 12 in the morning to just before 12 at night.

### Read the sentence and encircle the right option.

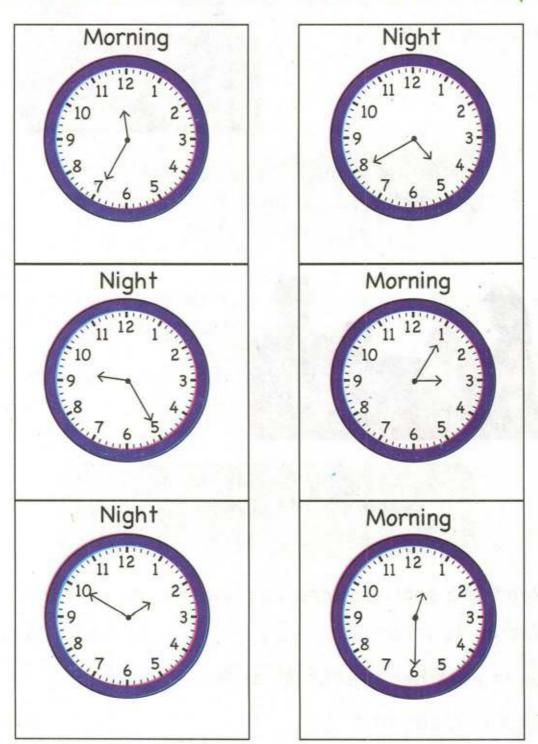

We go to school at 7 \_\_\_.

Sana eats her breakfast at 9 \_\_\_.

I go to sleep at 11 \_\_\_.

a m.	p m.
a m.	рm.
a m.	рm.
	7777

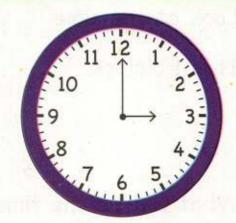

# Look at the clock. Read the time of the day. Write the time under each clock with a m. and p m.

Look at the time.

It is 3:00.

We say it is 3 o'clock.

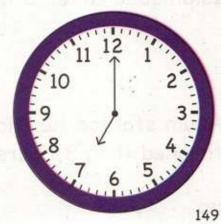

What will be the time after 2 hours?

It will be 5 o'clock after 2 hours.

What will be the time after 2 more hours?

It will be 7 o'clock after 2 more hours.

Look at the time.

It is 1 o'clock.

What will be the time after 3 hours?

Look at the time. It is 5 o'clock.

What will be the time after 1 hour?

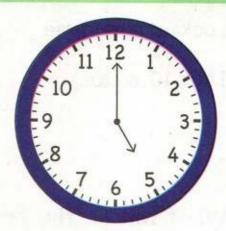

Ali left the house at 6 o'clock. He reached Islamabad after 5 hours. What was the time?

Anum started her homework at 2 o'clock. She finished it in 3 hours. What was the time then?

Look at the time.

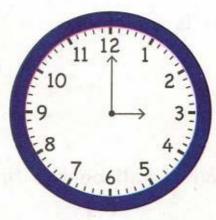

It is 5:00.

We say it is 5 o'clock.

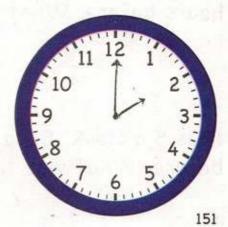

What will be the time 2 hours before?

It will be 3 o'clock 2 hours before.

What will be the time 1 hour before 3 o'clock?

It will be 2 o'clock 1 hour before 3 o'clock.

Look at the time.

It is 10 o'clock.

What will be the time 3 hours before?

Look at the time. It is 8 o'clock.

What will be the time 4 hours before?

It is 3 o'clock. Hassan started his homework 2 hours before. What was the time then?

It is 5 o'clock. Sana went to the market 3 hours before. What was the time then?

# Shapes

This is a triangle. A triangle has three sides.

This is a rectangle. A rectangle has 2 pairs equal sides.

This is a circle. It has no side.

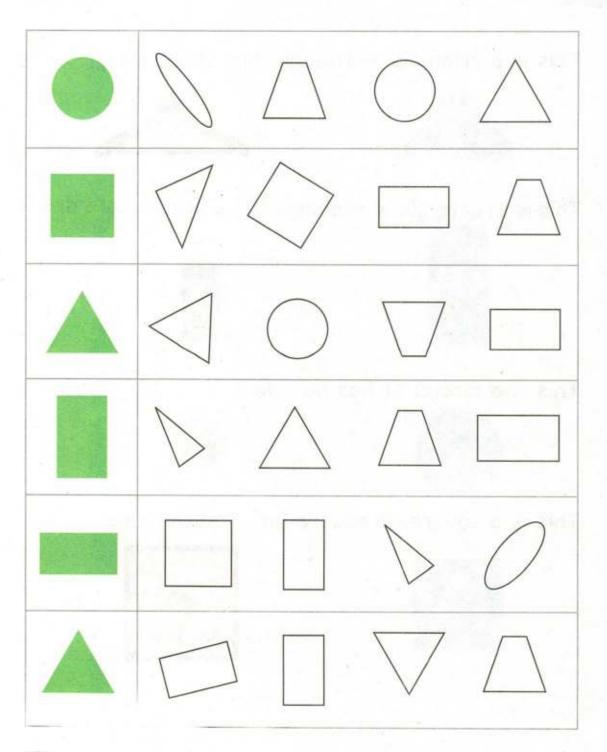

This is a square. A square has 4 equal sides.

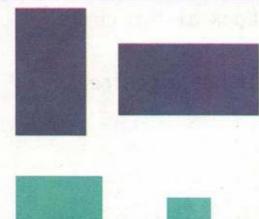

# Colour the shape that is like the one in the first column.

A rectangle has 4 sides.

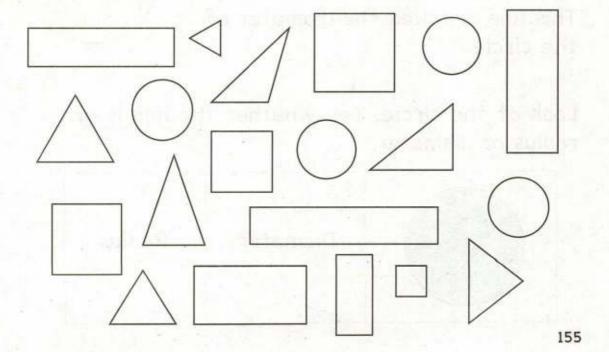

A square has 4 sides.

Both square and rectangle are quadrilaterals.

All quadrilaterals have 4 sides.

Write 1 in all quadrilaterals, 2 in all triangles and 3 in all circles.

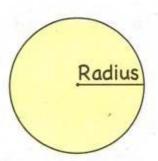

Look at this circle.

It has a centre.

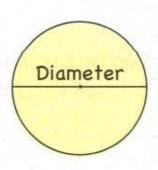

We can draw a line from the centre to a point on the circle.

This line is called the radius of the circle.

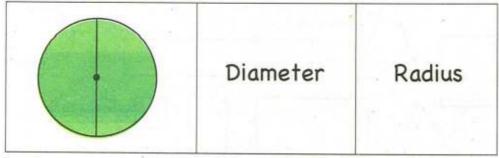

We can draw a line from one point on the circle to another point, through the centre.

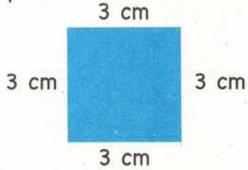

This line is called the diameter of the circle.

Look at the circle. Tell whether the line is of radius or diameter.

Each side is 3 cm long.

What is the total length of the square?

$$3 \text{ cm} + 3 \text{ cm} + 3 \text{ cm} + 3 \text{ cm} = 12 \text{ cm}$$

The total length of the square is 12 cm.

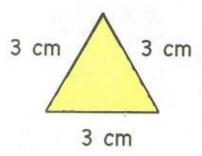

This is called the perimeter of the square.

The **perimeter** of a figure is the total distance around all sides of the figure.

### To find the perimeter:

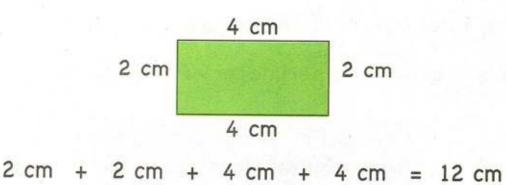

- 1 Look at the length of each side of the figure.
- Add all the lengths.

Find the perimeter of the triangle.

$$3 \text{ cm} + 3 \text{ cm} + 3 \text{ cm} = 9 \text{ cm}$$

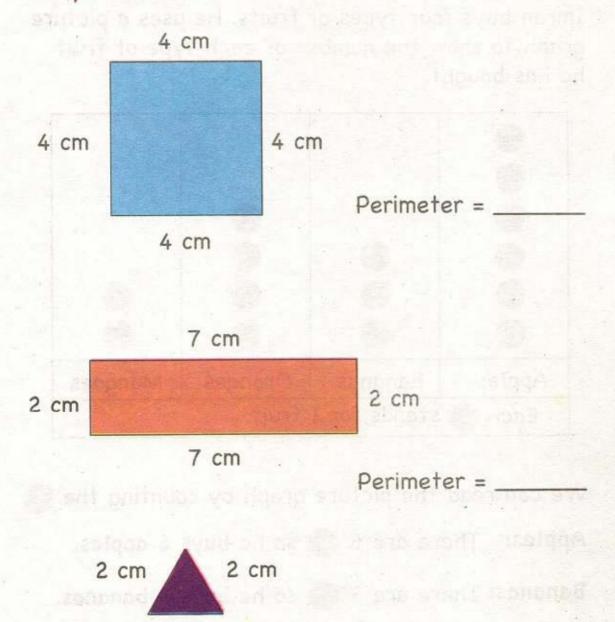

Find the perimeter of the rectangle.

Find the perimeter of the square.

$$2 \text{ cm} + 2 \text{ cm} + 2 \text{ cm} + 2 \text{ cm} = 8 \text{ cm}$$

# Read the length of each side of the figure. Find the perimeter.

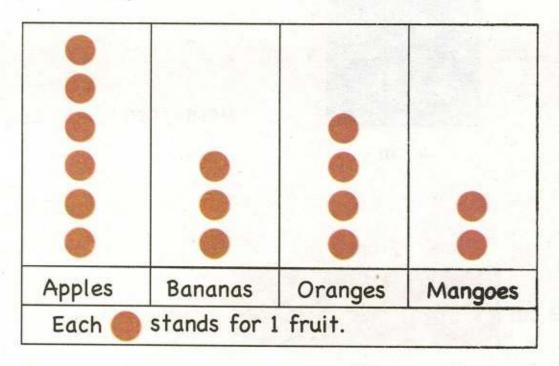

2 cm

Perimeter =

## Picture graphs

Imran buys four types of fruits. He uses a picture graph to show the number of each type of fruit he has bought.

We can read the picture graph by counting the

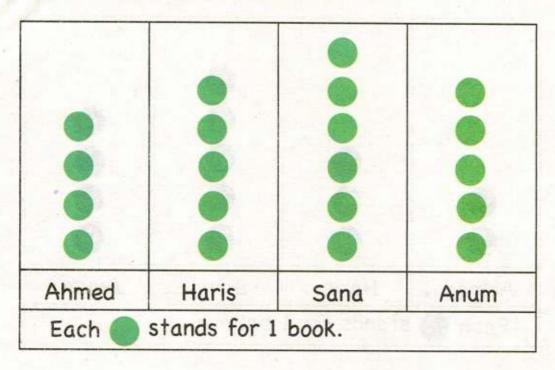

Apples: There are 6 so he buys 6 apples.

Bananas: There are 3 🌑 so he buys 3 bananas.

Oranges: There are 4 by so he buys 4 oranges.

Mangoes: There are 2 by so he buys 2 mangoes.

The picture graph below shows the number of books that each child has.

Read the picture graph by counting . Write the number of books that each child has.

Ahmed: \_\_\_\_\_

Haris:

Sana:

Anum: \_\_\_\_

The picture graph below shows the number of balloons each child has.

100			
		•	
Ahmed	Haris	Sana	Anum

Read the picture graph by counting . Write the number of balloons that each child has.

Ahmed: \_\_\_\_\_

Haris: \_\_\_\_\_

Sana:

Anum: \_\_\_\_

### **DENGUE FEVE**

This fever is caused due to the bite of a specific kind of mosquito. What's special about this mosquito is that it has white stripes on its body and it bites from sunrise to sunset.

#### Identification of the disease

The presence of virus of this disease in the body can be assured through blood test in the laboratory.

#### Indications

The specific indications of this disease include fever with:

- Severe headache, cold and flu.
- Pain in body, back and joints.
- Pain behind the eyes.
- Presence of red spots on the body.
- In case of serious illness, bleeding starts from different parts of body i.e. mouth, nose, etc.

If there are above indications, take the patient to nearest health centre and give him the liquids as prescribed by the doctor.

#### Precautionary Measures

- Keep your houses and work places protected against mosquitoes.
- Keep houses and work places airy, bright and moisture-free.
- Fix nets on doors and windows.
- Wear full sleeve clothes.
- Use mosquito nets while sleeping.
- Keep the overhead water tanks covered.
- Empty water containers after a week, let them dry and then fill again.
- (A) Water should not fall from the overhead water tanks to accumulate permanently, instead dry it.
- Water should not accumulate in any case both inside or outside the house.
- Keep your houses and mohallah's clean.
- (A) Keep the fence and hedge boundaries duly trimmed both inside and outside the house and spray over them with insecticides, particularly in the evening.
- Water should not stay all the time in the flower pots, flower beds, etc. Instead water them only in the morning every alternate day.

Dengue breeding place
